GRIFFING NURSERIES

BEAUMONT • TEXAS

Palmetto Palm—Hardy Variety
(*Sabal Blackburniana*)

Pindo Palm—Arched leaf type
(*Cocos australis*)

Washingtonia Palm—Fanleaf type
(*Washingtonia robusta*)

It's Holly Time in the South

Beautiful lawn of St. Augustine Grass, so extensively used throughout the Southwest. It thrives equally as well in full shade as it does in the open lawn.

Sheared Yaupon Holly makes most satisfactory hedges for the South

Ilex opaca

Thorny Dahoon Holly Berries (*Ilex Cassine*)

Griffing's New Holly has lots of berries, which remain on a year or so; it is never without berries. It's called Slack's Holly (*Ilex cornuta*).

American Holly (Berried)
Ilex opaca, "Christmas Holly"

Buford Holly Berries (*Ilex cornuta*)

A NURSERY WITH A BACKGROUND OF OVER HALF A CENTURY IN THE SOUTH GROWING TREES

Some sixty years have passed since the present Griffing Organization had their first inception in a small nursery in Northern Florida on land owned by the late D. C. Griffing, and managed by his five sons under the name of "Griffing Brothers."

Always the Griffings grew the stock they sold, offered the best of everything, experimented in every locality to find the most adaptable varieties, dug their Trees with care, packed under rigid inspection, and in all their activities gathered and disseminated information for the benefit of their patrons.

Panorama View of Our Extensive Nursery (200 acres of Griffings Quality Stock.)

PRESENT MANAGEMENT

W. C. Griffing, who has been AT THE HEAD of Griffing Nurseries SINCE ITS BEGINNING, is proud to have ASSOCIATED with him his son Lieut. Ralph C. Griffing, since his graduation from Texas A. & M. College in 1930, and it is THEIR INTENTION to carry on the Nursery Business THE GRIFFING WAY, symbolizing Quality Nursery Stock.

THE DEPARTMENT OF LANDSCAPING at the Nursery is under the supervision and management of Ralph C. Griffing who studied Landscaping Art in Texas A. and M. College of Texas, and who has served the Customers of the local area since he became associated with the Nursery business. While interrupted by four years spent in the U. S. Army, he is back on the job now ready to carry on with the Service of developing the Landscape of the Private Home grounds, Churches, Schools, and Public Buildings and upon appointment will be glad to go over such problems as brought to his attention.

WALTER C. GRIFFING, Father

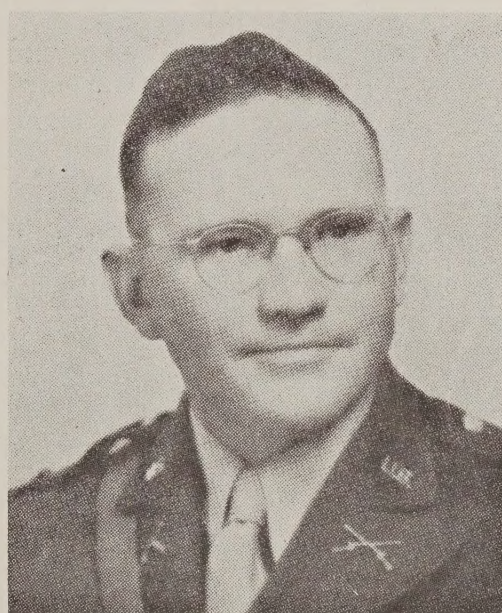

THE GRIFFING STORY

With a love of GARDENING INSTILLED by STURDY WELSH PARENTS, rich in old world lore, the Griffings have, for more than HALF A CENTURY, devoted their energies to seeking NEW VARIETIES, improving old favorites, and distributing among their EVER WIDENING circles of CUSTOMER-FRIENDS, plants that will add to the beauty and livableness of the Southern Home.

Thus was the beginning of the present Organization, which CONTINUES TO SERVE YOU. For adequate irrigation facilities, land was secured FIVE MILES NORTHWEST OF BEAUMONT, where the present OFFICES ARE LOCATED, where we have plenty of CHOICE BEAUMONT BALLING SOIL for growing Nursery Stock, and PRIVATE SIDE TRACKS for loading.

QUANTITIES OF BROADLEAF

For many years we have specialized in the production of BROAD-LEAF and Coniferous EVERGREENS, probably producing more

LIEUT. RALPH C. GRIFFING, Son

of these classes than any other SOUTHERN NURSERY. We have been able to determine the most hardy and SUITABLE VARIETIES for this section, and on these we have concentrated our MAIN EFFORTS, that our large 300 ACRE NURSERY yield an abundance of these plants to meet the ever increasing demand.

WELCOME TO VISIT OUR NURSERIES

Our Customers and Friends are always welcome to visit our Nurseries and make their selections in person, but they do not have to do this in order to get good selections of Landscape Material. Thousands of Customers have found this true, and it saves them time and worry when they can order the stock by the Standardized Quality, and let our experienced Field Foreman make the selections for you.

During the various Seasons of the year, we have items of special interest throughout the Nursery fields. In the Fall, the most interesting are the Berried Holly, and Firethorns, and colored foliage Trees. In the Mid-Winter the Camellias are most fully appreciated, and with the coming of early Spring we find a riot of color in the Wisteria, Redbud, Jasmines, Azaleas, etc. and in the Month of May the Fields are white with the fragrant Gardenia Flowers. With all the year round beauty, our Customers are always welcomed to the Nursery for a Drive through the grounds anytime.

SERVICE TO OUR FRIENDS

Mrs. Wilma Gunter Box, General Office Manager

In serving our large list of customers throughout the Southwest, we strive to have associated with us the best skill, knowledge and personnel that we can obtain. In this manner, have we been able to serve the many Customers over a period of years in their most interesting Landscape problems. The constant assistance of our trained employees has meant much to the satisfaction of our customers.

Mrs. Wilma Gunter Box, who has been associated with our organization since 1926, acts in the capacity of General Office Manager and is known to our Customers and members of the Trade throughout the Country.

In connection with her work with our Firm, Mrs. Box was rendered in 1944, the TEXAS ASSOCIATION OF NURSERYMEN'S Annual Arp Nursery Award for Meritorious Service to the Nursery Industry of Texas. In the same year, she was awarded a U. S. War Bond for enlisting the greatest number of Members to the Texas Assn. of Nurserymen, with which association we are actively working.

THANK YOU, FOR YOUR PATRONAGE IN THE PAST—It is through the patronage of our Customers that we have been able to make the advancement thus far in our line of business, and which enables us to carry on the struggle to serve you in the best manner possible with your Landscaping problems from day to day.

ASSOCIATION MEMBERSHIP

To further the interest of the Nursery and Landscape Development and keep posted on affairs of interest to the Trade, we maintain membership in the following Trade Associations:

American Association of Nurserymen, Landscape Nurserymen's Association of the American Association of Nurserymen, Beaumont Florists & Nurserymen's Club, Beaumont Chamber of Commerce, Louisiana State Horticultural Association, Inc., Oklahoma Association of Nurserymen, Texas Association of Nurserymen, Texas State Florists' Association.

TERMS OF SALE

GUARANTEE

All Trees and Shrubs are GUARANTEED True to Name, full count, up to grade and in GOOD CONDITION when shipped. We will replace any plant, PROVING UNTRUE to name. Our Stock is of the HIGHEST QUALITY, thrifty, and WELL GROWN, insuring success if PROPERLY CARED for after transplanting in your Soil.

While we exercise ALL CARE to have all Stock true to Name, it is UNDERSTOOD THAT should ANY STOCK prove UNTRUE to name, Griffing Nurseries shall be liable only for the Purchase Price of the Stock which PROVES UNTRUE TO name and no GREATER AMOUNT.

PRICE

Throughout this Catalog are f. o. b. our NURSERIES, and do not include ANY COSTS for services, Delivery or Insurance. This Catalog CANCELS ALL PREVIOUS PRICES; all prices ARE SUBJECT TO CHANGE WITHOUT NOTICE.

TERMS

CASH WITH ORDER unless credit has BEEN ESTABLISHED. Where credit is established, WE ALLOW 2% FOR PAYMENT IN TEN (10) DAYS, or thirty (30) days NET.

ALL ACCOUNTS ARE PAYABLE AT Beaumont, Texas. Cash with order or before shipment of goods UNLESS Terms are arranged PRIOR TO SHIPMENT.

RESERVE ORDERS

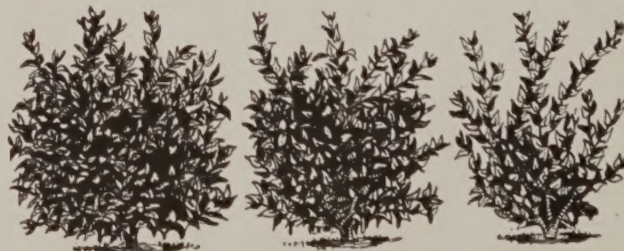

Orders booked IN ADVANCE of delivery date must be accompanied by 25% of the order TO INSURE US in reserving the goods for later delivery. No C. O. D. Orders WILL BE ACCEPTED UNLESS CREDIT RATING HAS BEEN ESTABLISHED, or 25% ACCOMPANIES THE ORDERS.

INSURANCE ON TREES AND SHRUBS

We do not guarantee the life of any plant purchased as we have no control over after-treatment or weather conditions, and we will not replace stock without charge. On request, we insure stock planted by us for a specified period at a rate covering the estimated hazard. Such insurance, however, is void unless account is paid in full within 30 days from date of invoice, except when special arrangements are agreed to by us in writing.

OUR GRADING SYSTEM

The Standardized System of Grading Nursery Stock as adopted by the American Association of Nurserymen is followed closely.

XXX XX X
Griffing's Waxleaf Ligustrum, illustrating Quality of Plants.

Illustrating Standardized Grading. All plants are the same height, but certainly there is a great difference in the general appearance and value. This is the only fair way of Grading Shrubs.

XX (Priced in first column) is well developed, standard merchantable stock, but not the best of the Species.

XXX (Priced in second column) is Heavy Specimens, well developed Stock.

EXTRA SPECIMENS: (Better Quality than XXX) is a Quality in which we specialize, which is above anything listed, and is often required by exacting Customers.

SPECIMEN NURSERY STOCK: For Specimen Stock above XX and XXX Quality, selected or marked in the Nurseries, will be priced according to its value.

BEAUTIFY YOUR HOME GROUNDS

"IT IS A HOME WHEN IT IS PLANTED"

GET JOY OUT OF LANDSCAPE GARDENING

One of the greatest joys of Gardening is in the planting of something new and watching it from day to day as it unfolds new beauty. It is true that certain features of your garden are permanent. Your Shade Trees, for instance, provide background for the setting, and frame the picture of your Home. Other features of the Garden may be changed from year to year to create new interest and continue to be a source of joy to the planter.

WHICH would you choose?

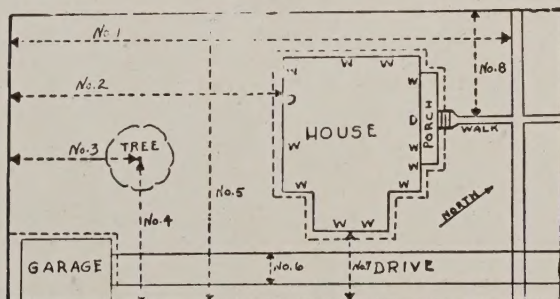

Of course you would choose the well planted place! Trees, shrubs, flowers and vines create an atmosphere of comfort, happiness and prosperity. Today, well planted grounds are the fashion.

Make your grounds more beautiful this year. A new tree or two, or possibly a few shrubs, plants and vines will add new beauty and interest. Come to us for help and advice with your Landscape planting.

SMALL HOME GROUNDS

For the average city lot, if you will SEND US the information as indicated on the SKETCH BELOW, showing the size of the grounds, location of drives, walks, permanent buildings, TREES already on THE PROPERTY, etc., it will enable us to furnish you with a DETAILED PLAN, together with an ITEMIZED LIST of the plants NEEDED, and an estimate OF THE COST of the plant material. All are mailed for YOUR APPROVAL.

THE SERVICE COSTS NOTHING

When you send THE SKETCH, with the information needed, also send us \$10.00 for a lot not larger than 75 by 100 feet. As soon as YOUR ORDERS FOR the material on the PLANTING LIST totals \$100.00 within ONE YEAR after the date of OUR ESTIMATE,

JOYS OF CREATING BEAUTY!

Civilization is measured by the love of the Artistic.

In the highly civilized countries of the old world such as France, Italy and England, one of the outstanding characteristic qualities of even the Peasant home is the love of Beauty. The yard is a riot of blooming plants and vernal Evergreens.

Year by year there is a marked increase among the home owners of America of those who appreciate the moral and social value of appropriate planting of the home grounds.

When you plan your home, remember the proper planting of the grounds is a necessary part of your home plan.

You'll find few diversions more delightful than the simple acts of planting and caring for your plantings. If you have not already, now is the time to plant those varieties that you have envied for so long. Spend your leisure time in your Garden, it will bring sunshine and happiness to your home.

USE LANDSCAPE PLANS

Should you desire the Services of a competent Landscape Architect to assist you in the proper arrangement of your Trees, Shrubs, and Roses, we will gladly assist you. As we are in direct communication with all leading Architects, perhaps we can refer you to someone in your immediate locality.

Today, the home owner is not satisfied until home grounds are planned and planted with suitable evergreens. This is also true of the School, Library and Court-house grounds, Parks and other Civic grounds.

the original \$10.00 payment will be placed TO YOUR CREDIT, or if a larger PLAN is DESIRED, 20% of the amount WILL BE CREDITED FOR the purchase of plants. The cost for larger grounds is SLIGHTLY MORE in proportion TO THE SIZE of the development and will be AGREED UPON when a preliminary SURVEY is made.

THE IMPORTANCE OF LANDSCAPE

The aim of Landscape Design is to produce the MAXIMUM OF BEAUTY consistent with utility. To attain THIS RESULT, it is usually best to secure THE SERVICES of a Landscape Architect, whose assistance will not only serve TO AVOID ERRORS but will also save EXPENSE ANY TIME.

LANDSCAPE PLANTING

A WELL-LANDSCAPED dwelling gives out a perpetual smile. Winter and summer alike—to its owner's family, and every passing stranger—it radiates quiet, JOY, refinement.

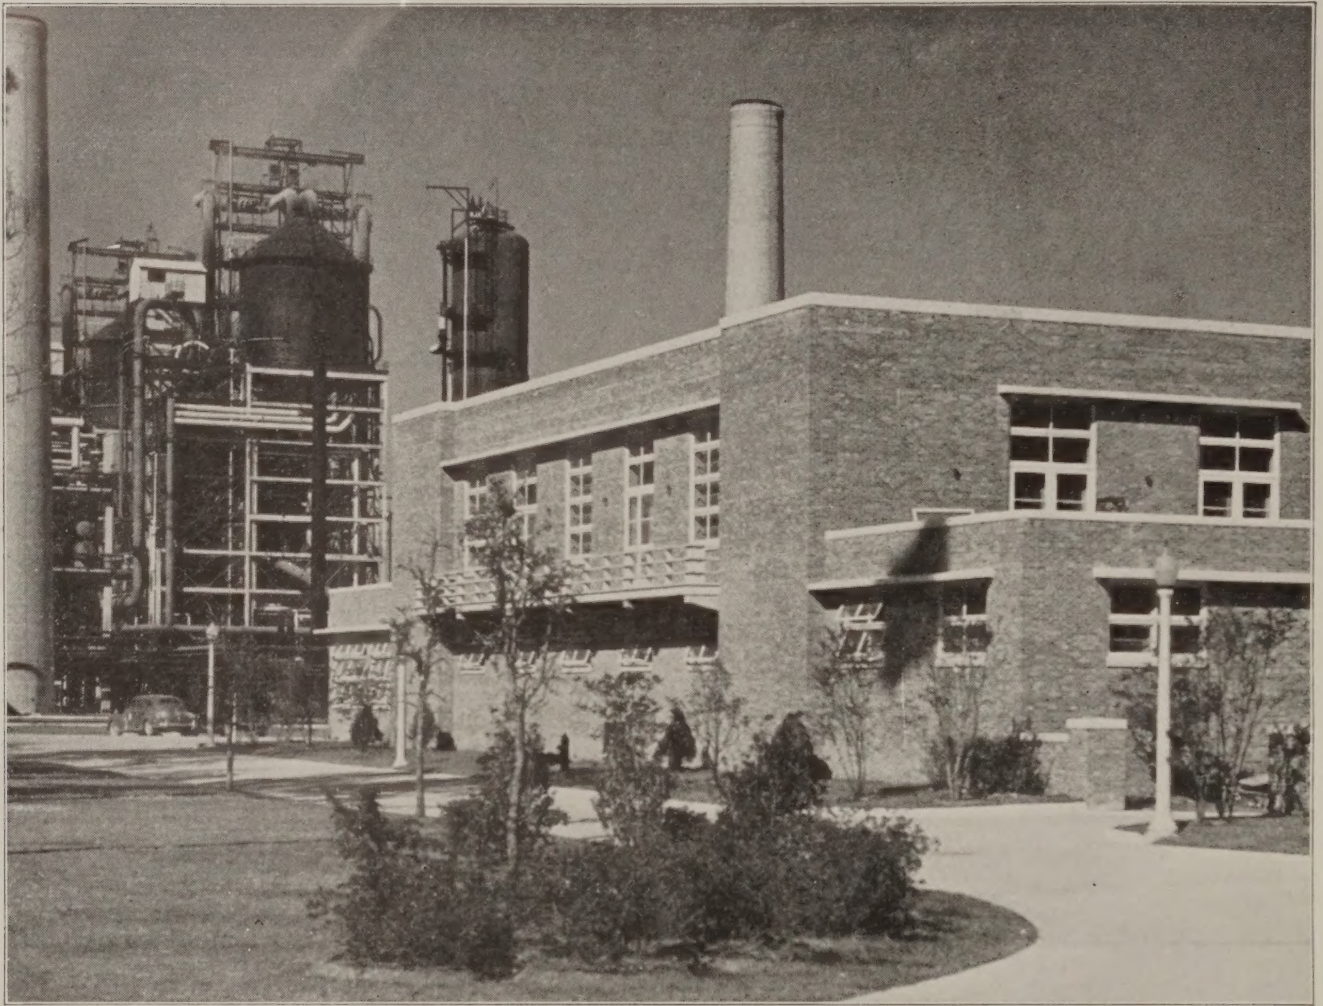

IT NEED NOT BE a large elaborate dwelling: A cottage, even more than a castle, needs A BECOMING SETTING. Neither is much room needed. On the contrary, never is the Landscape Architect's touch more wonderful—or needed—than in making the utmost of A NARROW OR SHALLOW LOT.

LANDSCAPING AN INVESTMENT

We have YET TO MEET the owner who ever regretted an INVESTMENT—where he had UNDERTAKEN this improvement under competent advice and DEALT DIRECT with reliable, established Growers. Even one great towering Shade Tree—what a restful DELIGHT IT IS! Worth hundreds of dollars. Yet not impossible to purchase by simply PLANNING FOR IT.

LANDSCAPE PUBLIC GROUNDS

BUSINESS OFFICES AND PLANTS

Landscape planting around the office and grounds of Cities Service Refining Corp. of Lake Charles, La.

THE IMPORTANCE OF LANDSCAPING THE BUSINESS GROUNDS!

As new office buildings and business plants are being constructed and located in areas where they have more space and room for development, it has been considered good advertising and pleasing to the public who patronizes the products produced by the plant, to make their headquarters as attractive and inviting as possible. To accomplish this, the grounds are cleared of all rubbish, the open areas are graded and filled and planted to a nicely developed grass lawn.

Shade trees, Evergreen shrubs and flowers are used to frame the buildings and lend beauty to the surroundings. It has resulted in lots of public grounds becoming as beautiful and well kept as the home-grounds.

PLAN GROUNDS BEFORE PLANTING

It is our recommendation that a Landscape Architect be engaged to survey the grounds and develop plans before any planting is undertaken, then proceed with the beautification after the plans are made. This will give the most exacting results for the minimum expenditure, and of a lasting effect.

Over a period of years, we have assisted in the development and planting of many public grounds, including those around Refineries, Manufacturing plants, Oil Stations, School and Church grounds, College Campus, Parks, Park-ways, Court-house, and City Hall grounds, etc. We take pride in each and all of those where we have had the pleasure of furnishing Plant materials, and they stand as a monument to

those responsible for the efforts put forth.

Hospital grounds, Cemetery developments, Large and small Public Housing projects have likewise received our attention, and throughout the Southwest our choice selection of Trees and Shrubbery has been used extensively in the beautification of these grounds.

THE JOY OF BEAUTIFUL GROUNDS

The Well designed Yard and Fruitful Garden give an incomparable joy in living in the Home and Out of Doors.

Wherever there is a Garden there will be found a home rich in contentment. The beauty and mystery of flowers never palls on our fancy from childhood to old age. Nursery rymes, children's stories, nature, poetry and literature abound with praise of Flowers. They inspire the expression of the finest emotions of which we are capable.

A small investment in Plant material will increase the value of your property far beyond the actual amount invested, and your improvement is permanent. Instead of taking depreciation in planting, you receive larger returns in increased Beauty and value every year.

There is joy and recreation in caring for the grounds and making intimate friends with the plants and flowers. These Associations will enrich your life and relieve the monotony of ordinary living. It is not difficult to do or is not so expensive. You can get all the help you need from Griffing Nurseries. Plan to do a little each year and in the end, you will have the ideal home grounds to enjoy.

BROADLEAF EVERGREENS

Modern Home-Plantings cannot be considered as complete—or hardly begun—if they do not contain a liberal supply of Broadleaf Evergreens. They are needed for the green foliage which gives color all the year, especially in winter when warmth and color are demanded. There is need for them in all plantings, particularly in the Outdoor Living Room where they lay claim in everyday beauty.

We have an unusually large collection of Broadleaf Evergreens. The plants are frequently transplanted, carefully pruned, and given plenty of space to develop into stately, vigorous and healthy specimens.

ABELIA

GLOSSY ABELIA

Abelia grandiflora

Bushy habit; arching branches. Leaves are oval shaped, about one inch long, finely toothed, and highly lustrous. Flowers are mostly in leafy terminal clusters, bell or funnel shaped **flushed pink**, followed by small, leathery, dry seeds. Blooming period from **June to October**. Prefer **well-drained soils**, mixed with leaf-mold, and full sun-light. **Useful for hedges**, sheared or in natural form, in foundation plantings, and in low group plantings.

Class	Min.	Height	xx	xxx
B&B 3 ft.		\$ 2.90	\$ 3.90
B&B 4 ft.		3.90	5.80

THE AZALEA FAMILY

A member of the Heath family, and very closely related to the Rhododendron, Azaleas are unquestionably the most beautiful of all flowering shrubs. Many varieties are grown only in Greenhouses, but more hardy cultivated varieties, originating in the hilly regions of Asia Minor are perfectly hardy when planted outdoors along the Southern Atlantic seaboard and Gulf Coast area. They have been planted and grown successfully as far as two hundred miles from the Coast.

AZALEA ROSE

For flowers at ALL SEASONS of the year, we have developed A VARIETY of Polyantha Rose, which planted IN MASSES resembles AZALEAS, when viewed from a distance, with their large SHOWY CLUSTERS of pink flowers; hence its name.

For full description AND PRICES see Flowering Shrubs.

Specimens growing in our Fields, ranging up to 8 ft. Spread, very thick and bushy plants, available this Season which can be dug B&B and transplanted successfully.

AZALEAS FOR THE GARDEN

Of all ornamental plants, none deserve more attention THAN AZALEAS, which are without a doubt the most beautiful flowering shrubs we have IN THE SOUTH. They are perfectly hardy, and by planting in masses, a pleasing effect is secured.

We have done considerable experimenting, at a cost of SEVERAL THOUSAND DOLLARS, with the DIFFERENT VARIETIES of Azaleas, and have practically discontinued growing ANY VARIETY EXCEPT the AZALEA INDICA FORMOSA. We have given special attention TO GROWING THIS VARIETY and offer an IMPROVED TYPE, much superior to those OFFERED AS THIS variety by other Nurseries. Our type has NO SUPERIOR.

HOW TO CULTIVATE AZALEAS

CULTURAL DIRECTIONS: To get the best results, Azaleas should be planted in partly shady locations, and particular attention should be given to protecting them from the hot sun in summer. The soil should contain an abundance of leaf-mold, peat, and sand, and should be well-drained. Azaleas **will not grow in limestone soil**.

Mulching with decayed leaves, preferably those of hard-wood trees, is a distinct advantage. Peat is also a splendid mulch for Azalea beds, as it retains the moisture. Applications of **aluminum sulphate** may be necessary when leaves become yellow, which indicates that the **soil has become impregnated with lime**.

FORMOSA

Azalea indica formosana

Medium size, dark green foliage. Large flowers of rosy color borne in masses which cover the entire bush in early spring. Will grow in the common soil of the garden, but prefer leaf-mold, peat or well-rotted mulch and manure worked into the natural soil. The most satisfactory variety for outdoor culture in the Gulf Coast.

We are listing here our own type of the Formosa, which from experience, we have found to do better in the Gulf Coast Territory. We recommend this particular type above all others.

Avenue of Azaleas
A gorgeous sight in full bloom.

VALUABLE FOR LANDSCAPING

Today, no landscape planting in the **coastal region**, whether for the small cottage, large estate, park, or public building, is complete without **AZALEAS** and **CAMELLIAS** — a **single specimen**, group or mass, nothing **adds** more color to the landscape at their blooming period, or without flowers, they are a most attractive, low-growing **evergreen broadleaf shrub**.

CAMELLIAS**SPECIMEN CAMELLIAS AVAILABLE**

While we have listed below only the small and medium size Camellias which are growing in our fields, we do have many Larger Specimens in our Fields priced according to the Size and Variety. These plants are cultivated sprayed and can be dug B&B for safe transplanting. The varieties vary from those listed here, to many rare types, and we recommend personal selection of these Specimens to fulfill your Landscape requirements.

**Purity Camellia****Prof. Sargent**

Camellias are sometimes called the "Aristocrats of Southern Gardens." They are easily grown in the South, and their rich, glossy foliage and colorful flowers make them unusually attractive. There are so many named varieties, but not all are desirable. The flowers are produced during the mid-winter when no other flowers are found in the garden, bringing increased admiration for this plant.

HOW TO GROW CAMELLIAS

Camellias grow in almost any soil, but they should not be planted in soil containing a great deal of lime, or fertilized with a mixture containing lime. A well drained, good garden soil, a little acid in reaction is preferable. Half shady locations are suitable especially when the plants are young; free blooming can be expected in a place entirely shady. They love a humid atmosphere, and watering should not be neglected during hot, dry months. Frequent syringing of the leaves help a great deal.

BON-AMI C. jap bon-ami

Medium size flower, semi-double with almost white flowers, red variegations. Blooms heavy and in mid-season.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$ 9.50	\$12.25
B&B	4 ft.	15.60	20.60

CHANDLERI ELEGANS**C. japonica**

Flowers are double, very large, and a Cherry-red to Rose pink splotched with white. Center petals interspersed with yellow stamens.

Class	Min.	Height	xx	xxx
B&B	2 ft.	...	\$11.70	\$14.70

B&B	4 ft.	...	36.00	42.00

LADY ALICE C. japonica

This variety is one of the very choice selections offered for general planting. The foliage is a rich green and attractive as an evergreen even when not in bloom. Very late blooming type, thus useful in selections where the cold injures the early flowers. The flowers are a dark red, peony shape and very double. Excellent for cut. Stocky compact growth is noticed on this variety.

Class	Min.	Height	xxx
B&B	4 ft.	\$58.00
B&B	4½ ft.	74.00

LILY C. japonica

Upright type of growth, rich foliage with double white flowers, which have an occasional stripe through the petal. Some flowers are solid white. Grows rapidly and very useful as specimen or accent in group plantings

Class	Min.	Height	xxx
B&B	3 ft.	\$ 6.75 \$ 8.50
B&B	4 ft.	9.50 12.25
B&B	5 ft.	15.60 20.60

POPE PIUS**C. japonica**

"Purple Dawn", "Purple Emperor", "Wm. Hastie". Very large extremely double flower with many small petals of rich crimson color.

Class	Min.	Height	xx	xxx
B&B	4½ ft.	\$47.50	\$60.00
B&B	5 ft.	56.25	71.25

**Camellia Japonica**

A large Camellia, perhaps 50 years old, can be moved successfully and produce a hundred times as many flowers as a small one.

PROFESSOR C. S. SARGENT**C. japonica**

This is one of the most choice selections of the Camellia family for use over a wide area. It has a broad pyramid habit of growth and very dark green rich foliage. The blooms develop early, sometimes in October and last over a long period thus making it most desirable. The flowers are large, very solid, dark red peony form and withstand all weather conditions well on the bush. Excellent for cut flowers also.

Class	Min.	Height	xxx
B&B	6 ft.	\$ 88.50
B&B	7 ft.	108.00

PURITY C. japonica

Pure White flowers, bushy symmetrical in shape. Good grower.

A popular variety widely known over the whole country. Plants upright in habit of growth, dark rich green foliage, very compact and bushy. Flowers a dazzling white of formal double type, slightly waved petals of porcelain texture. They are very long lasting and excellent for cut flowers.

Class	Min.	Height	xx	xxx
B&B	6 ft.	\$ 42.50	\$ 52.25
B&B	7 ft.	56.25	72.50

STAR WHITE C. japonica

Pure White, Semi-double, yellow stamens.

Class	Min.	Height	xx	xxx
B&B	4 ft.	\$ 15.60	\$ 21.25
B&B	5 ft.	21.25	28.75

CAPE JASMINE - *Gardenias*

Old Southern favorite with glossy leaves and masses of waxy white blossoms, very fragrant. Attains excellent height for foundation planting, massing, and for lawn specimens. Is one of the few heavy bloomers that give year around attractiveness. Cut flowers are exquisite. Masses of Cape Jasmine along property lines and for borders are always beautiful and their growth is so uniform that very striking informal hedges may be grown of Cape Jasmine alone, a remarkably beautiful planting, summer and winter. The characteristic plant of the South. Blooms highly valued in the North where it is known as the Gardenia of which romantic authors have written so freely.

SPREADING TYPE Gardenia Plants

Dwarf Gardenias are most useful to border walks, and fore-ground groups of a Formal Garden. They are green the year 'round, and produce a mass of tiny white scented flowers in the Spring.

GRIFFING'S B&B

GARDENIAS

Dug from our heavy Black soil transplant easily, and will bloom heavy the first season after Planting. You will find too that our plants are free of White fly, and where grown in our heavy soil are free of nematode.

Hardy Everblooming Cape Jasmine

DWARF SPREADING *Gardenia radicans prostrata nana*

Spreading habit. Small, pointed leaves about one-half inch wide, glossy green. Miniature Gardenia flowers, fragrant and snowy white; blooms early in the Spring and occasionally during the summer. Prefers neutral or acid soils. Grows better in full sun, but will grow in partial shade. Used for low groups and borders.

SEMI-DWARF *Gardenia stricta nana*

Semi-spreading habit. Leaves, dark green, about two inches long. May be grown in partial shade. Valuable for medium low groups or Foundation plantings.

Class	Min.	Spread	xx	xxx
B&B	18 in.	Sprd.	\$ 1.90	\$ 2.40
B&B	24 in.	Sprd.	2.40	2.90
B&B	30 in.	Sprd.	2.90	3.80
B&B	36 in.	Sprd.	3.80	5.50
B&B	4 ft.	Sprd.	5.90	7.80

FORTUNE Everblooming Cape Jasmine

Gardenia fortunei

Compact, bushy habit. Dark green foliage. More hardy than the Florida. Blooms are medium size, waxy white and sweet scented, appearing in the Spring, and at intervals during the Summer. This is the variety so much in demand for the Gardens of the South, as well as in the North, when given proper protection. Does not like lime or alkali soils.

FLORIDA *Gardenia grandiflora*

Very bushy habit. Dark green, glossy foliage. Large, white waxy, sweet scented blooms. Produced early in the Spring only. Will not thrive in lime soil; grows best in full sun.

Class	Min.	Height	xx	xxx
B&B	2 1/2 ft.	\$ 2.25	\$ 2.85
B&B	3 ft.	2.90	3.70
B&B	4 ft.	4.35	5.70
B&B	5 ft.	5.70	7.75
B&B	6 ft.	7.75	11.90

GARDENIA FLOWERS:

Are most attractive during the Spring months, and shrubs planted early will bloom the first year and more flowers each year to follow. When not in flower, shrubs are an attractive Evergreen in the Landscape planting.

COTONEASTER FRANCHET *C. franchet*

Semi-upright habit of growth, medium dull gray-green leaves, white underneath, dull red berries.

Class	Min.	Spread	xx	xxx
B&B	3 ft.	\$ 2.70	\$ 3.25
B&B	4 ft.	3.90	4.80

Gardenia Flowers

Blossoms of the Gardenia are most fragrant, and have many admirers during the Spring!

CHERRY LAUREL *Laurocerasus caroliniana*

WILD PEACH

Southern laurel

Cherry Laurel is one of the MOST VERSATILE of the Broadleaf Evergreens. It may be used in the foundation planting around a building, in border or group planting, for hedges, both formal and informal, and as specimens on the open lawn.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$ 3.20	\$ 4.50
B&B	4 ft.	4.50	6.00
B&B	5 ft.	6.20	9.80

Garden planting using Gardenias effectively

ELAEAGNUS

An Evergreen Shrub useful for Shade or Sun thriving equally as well wherever used.

ELAEAGNUS

No group of Broadleaf Evergreens have grown more in favor during the past few years than the Evergreen Elaeagnus. A most versatile Shrub, for foundation plantings, groups, borders or hedges. To our knowledge no other Shrub grows better than Elaeagnus in Shady Locations, as well as in full Sun. Small white flowers, followed by small transparent Red Edible Fruits.

NOTE—All Elaeagnus Cutting Grown.

BROADLEAF

E. pungens macrophylla

Leaves are large and pointed, dark green above the under surface and new growth are bright and silvery. Stems are fawn colored. Small, whitish flowers, followed by edible fruits.

FRUITLAND

E. pungens fruitlandi

Very similar to Broadleaf, only it has more open, weeping growth.

GRIFFING'S COMPACT

E. Griffing's Hort. Var.

New and unusual type, a sport of the Fruitland discovered by us in 1934. Preferred to all other varieties of Elaeagnus by many Customers and Landscape men because of its close Compact, attractive growth. Semi-spreading compact habit, leaves of medium size and quantities of small branches make it very attractive and good for clipped Hedges or Specimens.

ROSEDALE

E. Griffing's Hort. Var.

A new sport. Small leaves, upright growth, many small branches, making compact growth.

SIMON *E. pungens simoni*

Compact, bushy habit. Small dark green leaves, dotted with silvery scales on upper surface, and silver-white underneath. Young foliage and stems add attractiveness with their fawn colorings.

GRIFFING'S COMPACT ELAEAGNUS
The Most favored selection by many of our Customers.

Elaeagnus Hedge planted in full Shade which is thriving wonderfully well. The plants can be sheared to formal type, or allowed to grow in natural form.

PLANT IN THE SUN

Fine for Specimens and Facing Borders as the branches sweep the ground.

No group of Broadleaf Evergreens have grown more in favor during the past few years than the Elaeagnus family. A most versatile Shrub, for foundation plantings, groups, borders or hedges. To our knowledge, no other Shrub grows better than Elaeagnus in shady locations, as well as in full sun.

USE ELAEAGNUS FOR HEDGE PLANTINGS In Sun and Shade

Most hedge materials fail to thrive in shade, yet often hedges are required under Shade Trees as well as in the open sun. Most satisfactory for this purpose has proved the Elaeagnus which seems to care not a bit whether it is called upon to grow in the bright sun or dense shade.

They have found their way into many Gardens in the Southwest, and have received much praise and admiration wherever they are planted. With their increasing popularity they are destined to be the most outstanding Broadleaf Evergreen for general use.

NOTICE!

Shrubs and Trees in this catalog are listed by the groups into which they are used in the Landscape. If unable to find what you are looking for, refer to the Index and save time.

DWARF THORNY

E. pungens nana

Semi-spreading compact habit. This variety is exceptionally good when planted under Windows where it can be constantly sheared, making a wide Spreading Evergreen growth.

Class	Min.	Spread	xx	xxx
B&B	18	in.	\$ 1.75	\$ 2.50
B&B	2	ft.	2.50	2.80

B&B	4	ft.	5.80	7.50
B&B	5	ft.	7.90	11.50

EUONYMUS WINTERCREEPER

E. fortunei

Low spreading habit, with small limbs branching upward. Shiny green leaves, turning bronze during the winter, the outer edges often tinged with scarlet. Grows equally well in sun and shade, and under practically all soil conditions. Fine for edging beds where a low border is desired. Good for ground cover under large trees and on terraces. A little pruning will make this plant a good creeper.

Class	Min.	Spread	xx	xxx
B&B	18	in.	\$ 1.20	\$ 1.50
B&B	2	ft.	1.50	1.90
B&B	2 1/2	ft.	2.25	3.25

This is how we dig Specimen Shrubs from our fields, properly B&B and transplant them to the Customer's lawn for immediate effects.

Elaeagnus Shrubs have many uses—as Specimens in Foundation Plantings in full Sun or Shade, and also useful when used in trimmed hedges.

FIRETHORNS

For colorful shrubs to use in the Landscape, there are no more beautiful selections to use than the Firethorn (Pyracantha) with their wealth of colorful Red, Orange and yellow Berries during the Fall and Winter Season. These are useful as Specimens, in Background plantings in the Garden, and trained into specimens in Foundation groups beside walls.

Griffing's Grown Firethorns are easy to transplant—as they are grown on our heavy black balling soil and can be taken up with a solid Ball without injury to the root system. We recommend reducing the crop of berries in transplanting the shrubs unless they are given careful attention in transplanting, as the berries take lots of strength at the time of planting.

FIRETHORN—

Pyracantha

Sometimes called "Crataegus" and "Evergreen Hawthorn". A family of plants of the greatest beauty in masses against foundations, along borders, etc.; graceful branches brilliant winter berries. The berries cling till spring, when attractive white flowers take their place, so that the plant always has some beauty in addition to its green foliage.

The larger sizes require large balls and severe pruning.

ALL FIRETHORNS CUTTING GROWN:

Colorful Berries on all Pyracanthas shown up in Fall and Winter Season. They vary from the orange color of the Lalandi, to reddish-orange, and scarlet of the New "Wilma" variety.

DUVAL P. duvaldi

Semi-upright habit of growth, large red berries in mid-Winter.

GLORIOSA

Pyracantha gloriosa

Upright Spreading habit, Bright orange-Red berries form in large clusters

Very outstanding variety for general use in Landscapings, most colorful with the richness of the orange-red berries in Fall and Winter season. Should be planted in masses or in back-ground where plenty of room is allowed for growth and development.

LALAND Burning Bush

Pyracantha lalandi

Broadleaf Evergreen Shrubs. Pyramidal growth, upright branches. Small grayish-green leaves. Small white flowers in the spring, followed by a wealth of orange colored berries lasting through the winter. Thrives in any soil. A native of China, but proven entirely satisfactory for this country. Good for planting in masses with other Broadleaf Evergreens, adding color wherever used.

YUNNAN Chinese Firethorn

Pyracantha yunnanensis

Spreading habit. Should be planted in groups of from 5 to 8 ft. apart. Smooth, oblong leaves, bright green in color. Small white flowers followed by coral red berries, making it very attractive in Fall and Winter. Grows freely in all soils and will grow in shade. A native of China. If not severely pruned will cover a large area.

CLUSTER OF RED BERRIES of Wilma Firethorn

The Berries of the new WILMA FIRETHORN are borne in masses all over the plant. A most gorgeous sight during the Fall and Winter seasons.

THE NEW FIRETHORN "WILMA"

Altho we have offered this variety of Firethorn, or Pyracantha for several years, it continues to grow in popularity, and each year the demand for the plant increases.

This new variety was introduced by us as a beautiful shrub. Its masses of large red berries in the Fall and Winter months add a wealth of color to any planting. In the Spring the blossoms are striking—much like the Bridleweath in flower. It has many uses in the landscape planting, always pretty and very colorful.

WILMA P. Griffing's Hort. var.

A new Firethorn we introduced that has upset all records for sales. It is upright in habit of growth, masses of White flowers in the Spring and clusters of large Gorgeous Red Berries during the Winter Season. WILMA FIRETHORN is the most talked of and in greater demand than any other variety we grow.

UPRIGHT GLORIOSA

P. gloriosa

Upright Spreading habit. Bright orange-red berries forming in large clusters.

TREATMENT FOR MORE BERRIES ON FIRETHORN

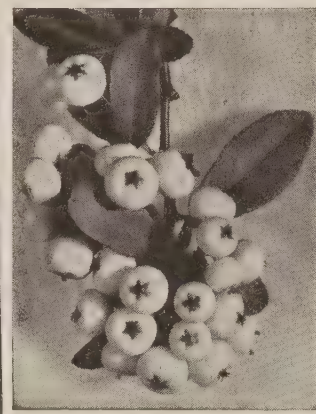

To keep a regular crop of Berries on the Firethorns annually, the Shrubs should be fed with Potash Fertilizer each Winter. This is especially true when the soil is high in Nitrogen content.

PRUNE FIRETHORNS in the SPRING

To keep Firethorn shrubs in shape prune in the early Spring before the blooms open, to avoid cutting off the berries for the Fall. New growth can be trimmed in the Summer or late Fall without injury to berries.

The New Pyracantha "Wilma"

Cluster of Berries from Wilma Firethorn.

FIRETHORNS COLORFUL IN BORDER GROUPS

These Shrubs are inclined to make a rank growth, and are most useful in spaces in the Landscape where you have plenty of room for them to develop. They can be sheared or trimmed back however to any desired effect, often times sheared into a compact hedge or screen; or trained into an upright growth against walls.

GUAVA**LEMON****Psidium cattleianum**

Semi-spreading habit of growth, with light green glossy foliage. Has delicious fruit, bright yellow when ripe and can be eaten fresh or made into jelly.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$3.80	
B&B	4 ft.	4.70	

Church Landscaped With Evergreens

GUAVA—Feijoa**PINEAPPLE****Feijoa sellowiana**

Leaves are medium size, the upper surface being a glossy green, and silvery-gray underneath. The flowers are whitish-purple with many conspicuous red stamens. Medium size, edible fruit, which is dark green, tough skin, white flesh, which is sweet and delicious for eating fresh. Ripens in October to December. This ornamental fruit-bearing Evergreen has many desirable uses. Valuable in Landscape Plantings as specimens or in groups and masses. The fruit is delicious when eaten fresh, crystalized, preserved or made into jellies. Well adapted to the Gulf Coast, and should be planted extensively.

Class	Min.	Height	xx	xxx
B&B	5 ft.	Very Compact	\$ 8.50	
B&B	6 ft.	Very Compact	13.50	

Pineapple Guava—An ornamental that bears attractive flowers and edible fruit.

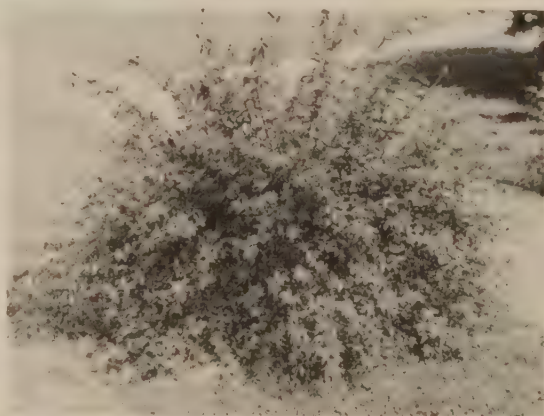

JASMINE—**Jasminum**

The group of low Spreading Jasmynes are very useful in groups, and borders where a low Type Shrub is needed. With their attractive foliage and Yellow flowers, they are always pretty.

SHOWY (Florida) JASMINE (Bush) J. floridum

Erroneously called "Italian Jasmine". Leaves alternating on the stem. Low growing, weeping branches. Dark, rich foliage; small leaves. Small yellow flowers during the summer. Grows in all kinds of soil. For low borders and edging foundation plantings.

Class	Min.	Height	xx	xxx
B&B	2 ft.	\$ 2.20	\$ 2.80
B&B	3 ft.	2.80	3.40
B&B	4 ft.	3.40	4.80
B&B	5 ft.	4.80	5.60

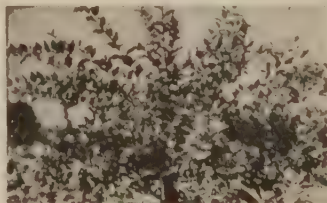

Primrose Jasmine which bears attractive yellow flowers in early Spring, most useful in low groups and foundation plantings.

ITALIAN JASMINE (Bush) J. humile

Erect growing type or "True Humile" as known to the Trade. Yellow flowers in Spring. Angled branches, of loose spreading habit. Leaves are dark green above, paler beneath, with edges slightly rolled under. Flowers are bright golden yellow, and fragrant, borne in summer and fall.

PRIMROSE JASMINE (Bush) J. Mesnyi

Arching branches, weeping habit. Medium size, light green leaves. Bright yellow, funnel-shape flowers, about one inch across, borne in early spring. Grows in all soils. For hedges, or with a little training, makes a fine specimen. In specimens, the branches weep to the ground making a fountain effect.

Barbados Cherry Malpighia

LOQUAT—**Eriobotrya japonica****Japanese Medlar Japanese Plum**

Broad, upright habit of growth. Broad, silvery-green, downy leaves, lighter color beneath. Flowers borne in fragrant panicles from 3 to 7 inches long in the Fall and Winter. The fruit is golden yellow, medium size, and of good flavor; ripens in the early spring. Good for ornamental purposes, because it will grow in a wide variety of soils. Used best as a specimen or in background screening.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$ 2.60	\$ 3.00
B&B	4 ft.	3.00	4.20
B&B	5 ft.	4.20	6.20
B&B	6 ft.	6.20	9.80

MALPIGHIA**BARBADOS CHERRY (Bush) Malpighia glabra**

Compact, bushy habit. Small oval leaves, light green in color. Flowers rose-pink, small but showy. Fruit red, acid, about the size of a cherry. Useful in low groups and foundation plantings.

Class	Min.	Height	xx	xxx
B&B	15 in.	\$ 1.90	\$ 2.40
B&B	18 in.	2.40	3.20
B&B	2 ft.	3.20	4.50

The Brilliant Red foliage of the Nandina, and clusters of Red berries makes it a most desirable shrub for the Landscape at all Seasons.

NANDINA**Nandina domestica****QUININE BUSH****Heavenly Bamboo**

Compact, bushy habit with bamboo or reed-like canes. Delicate compact foliage, green in the spring and summer with pinkish tint, turning to a brilliant red in the winter after frost. Creamy-white flowers borne in clusters, are followed by large bunches of green berries, turning to bright scarlet in the winter. Grows in either sun or shade, and is not particular as to soil conditions if it has good drainage.

Its red foliage and large clusters of scarlet berries make this one of the most beautiful plants for the winter months. It can be used as an upright shrub, but with severe pruning, it will make a heavy, compact shrub.

Class	Min.	Height	xx	xxx
B&B	15 in.	\$ 1.50	\$ 1.80
B&B	18 in.	1.80	2.70
B&B	2 ft.	2.70	3.60
B&B	2 1/2 ft.	3.60	4.90

HOLLY - - ILEX

The Hollies are beautiful plants at all times, some varieties making LARGE TREES, and others small COMPACT SHRUBS. Being clothed in hard, shiny irregularly formed foliage, they hold their own among other Trees and Shrubs but in Winter, when loaded with BEAUTIFUL BERRIES, they are the GLORY OF THE GARDEN.

The Hollies are adapted to many uses—as individual specimens, in groups, foundation and border plantings, and formal CLIPPED HEDGES, grow readily in the shade, and are not affected with heat or drouth conditions.

To insure a large and regular crop of Berries every year they require pollenizing.

HOLLY-Ilex

There are many kinds of Holly, some make Trees, other Shrubs; all are valued for their Berries.

NOTICE: BOTH PISTILLATE (Berry-bearing or Female) AND STAMINATE (Non-Berry-bearing or Male) types. The Pistillate type will bear berries only when properly cross-pollenized by the STAMINATE TYPE. There should be one staminate for every five pistillate.

AMERICAN Ilex opaca BERRY BEARING - PISTILLATE-FEMALE.

Tall, pyramidal growth with horizontal branches. Large, rounded, glossy, dark green leaves with spines. Bears masses of bright red berries in winter. Grows both in shady locations and in full sun. Thrives best in sandy loam soil. This is the beautiful Holly used for holiday decorations. In addition to this, it is one of the handsomest Evergreen Shade Trees. It is worthy of far more attention for Landscape Gardeners than it usually receives. A native of the Eastern and Southern States.

A NEW HYBRID HOLLY

The Slack's Holly is another new introduction to the gardening public of the Southwest by ourselves, of which we are very proud. This is a hybrid Chinese selection, which develops into a lovely upright specimen, bearing lots of large red berries each season. Berries remain on for several Seasons, and it does make one of the most outstanding Specimens in the Landscape.

Rich dark green foliage, in contrast with the very large red berries makes this new Slack's Holly most desirable for Specimens in the Landscape wherever used.

SLACK'S HOLLY I. cornuta Slack's New Hort. var.

Chinese Holly, grown from cuttings. Unusual type, upright natural habit of growth, holding Berries long periods, such that always covered with Red Berries after attaining Specimen size.

YAUPON HOLLY

Ilex vomitoria

This is undoubtedly the best of the southern native shrubs. It can be kept sheared resembling the fine-leaved Boxwood. The finest shrubs for compact hedges, sheared or unsheared. The young stems are light brown, turning to a light gray. The leaves are small, lustrous green above, and paler beneath, and cling from shady locations, or in the open sun. Makes the best Evergreen Hedge. Also, useful as specimens, screens, accents in foundation plantings; in fact, anywhere in the Landscape planting. They can be pruned to any size, and with little work, look well at all seasons. Immune from all kinds of insects and fungus diseases.

Nursery grown, root pruned, balled from our Beaumont Soil. Compact growth, highly improved over those grown in the woods. We have sheared some into Globes, Cones, Squares and Pyramids. We also grow blocks for Hedge Purposes and constantly headed back while small makes low compact hedges to start with. Umbrella shaped trees or compact bushy shrubs.

BERRIES of YAUPON HOLLY

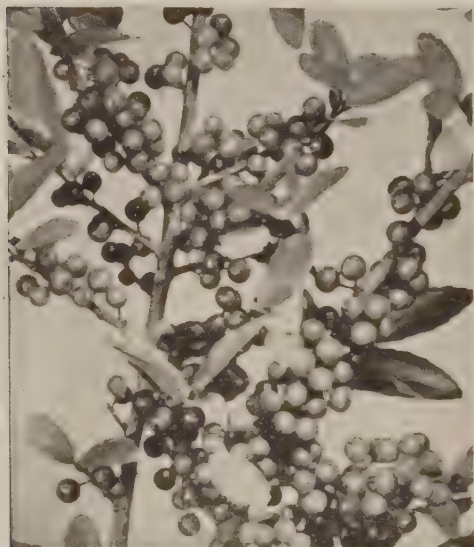

YAUPON HOLLY—Natural Growth

NON - BERRY BEARING—STAMINATE or MALE PLANTS.

You will need 1 of these to 3-5 Berried plants to pollinize them.

These are Staminate plants, or small ones that have not shown Berries yet.

Yaupon Holly are most useful in Southern Landscape Plantings. The red Berries most prominent in the Winter Season adds beauty to the shrubs.

YAUPON HOLLY—Natural Growth (Not Sheared)

BERRY - BEARING - PISTILLATE—FEMALE PLANTS

Umbrella shaped-trees or compact bushy shrubs. The finest shrub for compact hedges, sheared or unsheared. The young stems are light brown, turning to a light gray. The leaves are small, lustrous green above, and paler beneath, and clinging from two to three years. The transparent red berries, borne in profusion on the stems, cling until late spring, and are very outstanding.

This variety of Holly grows in all soils, and in shady locations, or in the open sun. Makes the best Evergreen Hedge. Also, useful as specimens, screens, accents in foundation plantings; in fact, anywhere in the Landscape Planting. They can be pruned to any shape or size, and with but little work, look well at all seasons. Immune from all known kinds of insects and fungus diseases.

HOLLY HEDGES USEFUL IN THE LANDSCAPE

Sheared Yaupon Holly Hedge—After 5 years only 10 in. high and 6 in. wide. American Holly Hedge in background.

YAUPON HOLLY FOR HEDGES

CLIPPED TO LOW NEAT BORDERS

YAUPON HEDGE or CLIPPED BORDERS

Not Bearing Yet, or Staminate

BEST HEDGE KNOWN, free from insects, compact growing and REQUIRES LESS SHEARING than other hedge plants, VERY HARDY, having dark green appearance. The best all around hedge CAN BE KEPT SHEARED not over 8 to 12 inches high or wide, or it can grow up and make large formal hedge, loose, natural growth border or screen hedges. These have BEEN SPECIALLY TRAINED FOR HEDGE PURPOSES, having been continuously HEADED BACK to make them compact and BUSHY FROM THE GROUND.

The short stubby compact growth of the Yaupon Holly makes it easy to shear and shape into low neat clipped hedges and borders.

Yaupon Holly and Elaeagnus make excellent Hedges, whether in Sun or Shade, and add beauty to any Garden planting where used.

SAVE TIME — SAVE LABOR ON HEDGES USE YAUPON HOLLY

The Dwarf type Yaupon Holly used for low hedges grows slowly, and requires pruning once or twice during the year, and still will look nice at all times.

SHEARED YAUPON HOLLY

For immediate effects in the Landscape, we have sheared and shaped in our fields Yaupon Holly Plants; in Squares for Hedges, Globes, Pyramid Shapes, and Columnar types for use in the Formal Garden plantings.

SHEARED and SHAPED YAUPON GLOBE & SQUARE YAUPON HOLLY—Sheared

We offer the following Sheared Specimens in Squares and Globe shapes most suitable for formal use in Landscape plantings. We are giving in the listing below the average spread of the plants and the height will average about the same as the Spread given.

Specimen Magnolias and Live Oaks loaded on Gondolla cars enroute for Landscape Planting project.

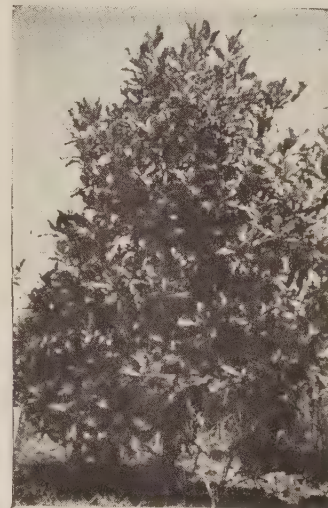

MAGNOLIAS

The Magnolia family consists of the Magnolia grandiflora so commonly known in the South. We offer several of these varieties, and especially the large leaf Southern Magnolia which should be planted extensively in the Southern States.

MAGNOLIA SOUTHERN

Magnolia grandiflora

Oblong oval shaped-leaves, shining green on the upper surface, coated with brownish, hairy substance beneath. The creamy white blossoms 8 to 10 inches across, begin opening in April, and a few can be seen until late Fall. The brilliant red seeds project from the brown cone, each seed swinging on a silken thread, makes it beautiful in the Fall. The leaves shed at the end of the second year, and at no time is the tree bare. Excellent as a street tree, shade or specimen. Thrives best in loamy soil, and is a wonderful shade tree for the South.

Low Branched Specimen Magnolia

SOUTHERN MAGNOLIAS are a choice Specimen for the Gardens of the South. It is a most stately tree and adds beauty wherever used.

OLEANDER—**Nerium**

We have taken special care to select accurately and list according to descriptions, so that a customer can know exactly what color Oleanders he is getting. As novelties for your home grounds, you will find these to be most beautiful.

The well-known shrub bearing long leaves and very brilliant heads of colorful blooms, good for outside effect and beautiful for cut flowers. Upright growth, good for mass and foundation planting. Unsurpassed as a lawn specimen or shrub to alternate with street trees or beautify a boulevard or park. If tops freeze back in more northern locations it will come out from the roots with luxurious growth.

Oleanders in Parkway

CARDINAL, (Hardy Red)

Upright branches, bushy habit. Long, narrow leaves. This is an unusual shade of pure Red. Flowers produced in clusters during the summer. This variety withstands freezing temperatures. Good for masses, heavy branched specimens, and street planting.

PINK, DOUBLE

Rich deep pink color flowers, very double which blooms heavy in early Spring and during Summer seasons.

PINK, SINGLE LIGHT

Light pastel pink flowers, single, which produces masses of flowers each season.

WHITE, DOUBLE

Pure white flowers, very double which flowers heavy in Spring and Summer.

WHITE, SINGLE

Flowers single but produced in masses all over the shrub in Spring and Summer.

WHITE, PINK-CENTER

Flowers quite double with decided pink center. Heavy flowering type.

VELVETY RED, DOUBLE

Small compact growing shrub with flowers of a deep dark velvety red color.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$ 2.40	\$ 3.00
B&B	4 ft.	3.00	3.90
B&B	5 ft.	3.90	5.25
B&B	6 ft.	5.25	7.50

Five miles of Oleanders planted on levee of Sabine Ship Canal at Port Arthur, Texas.

PHOTINIA**HOLLYLEAF****Photinia dentata**

Large leaves, new growth, first red, then a fawn color, and then a rich green. In the fall some leaves again assume a dark reddened hue. Leaves are decidedly notched. White flowers borne in clusters or panicles, followed by small red fruit.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$ 2.40	\$ 3.20
B&B	4 ft.	3.20	4.60
B&B	5 ft.	4.60	6.80

PITTOSPORUM

One of the aristocrats among Southern evergreens. Pittosporums are perhaps more FREQUENTLY ADMIRER than any other broadleaf evergreen. The leaves which grow in whorls FORM A ROSETTE at the end of the twig. This along with the dense dark green mass of the plant comprises its chief charm. Pittosporums take kindly to shearing. Does well near the seashore.

TOBIRA—Green**Pittosporum tobira**

Spreading habit, branching close to ground. Leaves are medium size, dark, glossy green, edges curved downward. Small, yellowish-white flowers borne early in the spring, the fragrance resembling orange-blossoms. Fits well into groups or masses, forming a dark green compact mound.

Class	Min.	Spread	xx	xxx
B&B	18 in.	\$ 2.20	\$ 2.80
B&B	2 ft.	2.80	3.60
B&B	2½ ft.	3.70	4.60

B&B	4 ft.	5.90	7.60

B&B Oleander

B&B Pittosporum

WHITESPOT**P. tobira variegata**

Spreading habit of growth, short symmetrical branches forming a dense, compact mound. Medium size, glossy green leaves margined with orange-blossom fragrance, borne in the early spring. Useful in masses, groups, and especially where color contrast is desired.

Class	Min.	Spread	xx	xxx
B&B	18 in.	\$ 2.80	\$ 3.60
B&B	2 ft.	3.60	4.60
B&B	2½ ft.	4.60	5.80
B&B	3 ft.	5.80	6.80

PODOCARPUS — yew

One of our most Attractive Shrubs. The edible fruit is very peculiar, as it has a blue stem with a red ball at the end. Can be planted at the edge of Salt water without injury. One of the most versatile Trees grown, for borders and groups, or as individual Specimens.

A Very Choice Specimen for the Landscape

BROADLEAF YEW**Podocarpus macrophylla**

Beautiful evergreen, upright branching shrub or small tree. Rather broad leaves, light green when young, dark green when mature.

LITTLELEAF YEW**Podocarpus microphylla**

Similar to Broadleaf except Bush is more compact in form, and more slender growth; leaves are more narrow, and are dark green from youth to maturity.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$ 3.80	\$ 5.50
B&B	4 ft.	5.50	6.80

B&B	8 ft.	16.80	19.80
B&B	9 ft.	19.80	24.00

PRIVET - Ligustrum

PLANT GRIFFING'S LUCIDUM ORIGINATIONS

This group of shrubs is essential to LANDSCAPING. The word "Ligustrum" refers to the entire family of PRIVETS, which is by far the largest and best group of Broadleaf Evergreens. Varieties differ widely IN SIZE, SHAPE, HABIT OF GROWTH, AND COLOR. With the addition of very few plants, such as CONIFERS, FLOWERING Deciduous Shrubs and the Grasses, the Privets make complete cheap Planting.

Fragrant WHITE FLOWERS are borne in Spring, and the BLACK BERRIES FOLLOW, remaining on the plants during winter.

CUTTING GROWN LIGUSTRUMS BEST

We grow many varieties of the Ligustrum, varying in foliage and manner of growth. All these shrubs are grown from original Stock plants by cutting, and are true to name and habit of growth. Our plants are field grown, with good root-system and transplanted B&B, such that they live and give lasting results.

Acres of Griffing's Waxleaf Privets

WAXLEAF

L. lucidum compactum

Broadleaf Evergreen Shrub. Globe shape, with compact habit of growth. Branches close to the ground. The leaves are very thick and waxy, the upper surface being a very dark green, the underside of a lighter shade. The true "Griffing's Waxleaf" has a peculiar curl in the leaf making it different from any other Waxleaf. Grows well in all kinds of soil, full sun and in shady locations. We introduced this variety. Selected by a mutation (sport) different from the ordinary Lucidums. Can be used as specimens, on parkways or foundation plantings, in screens or hedges to a good advantage.

PRICE OF BLACKLEAF, CRINKLEYLEAF, and GRIFFING'S WAXLEAF PRIVET BELOW:

B&B 6	ft.	8.80	12.50
SPECIMENS 7 ft. up \$14.00 and up.				

Crinkleyleaf Privet

BLACKLEAF

Ligustrum lucidum nigrifolium

Broadleaf Evergreen Shrub. Leaves so dark they appear almost as a black-green, thick and glossy. Grows in all types of soil, and holds its dark green color under most all conditions. It makes a medium spreading growth, and hardy for all the South-west territory. This is a fine variety for massive plantings, backgrounds, or whatever place it may be used for a bushy spreading growth. Very hardy.

CRINKLEYLEAF

L. lucidum recurvifolium

Broadleaf Evergreen Shrub. Heavy branched, upright pyramidal growth. Dark green, pointed crinkley leaves, foliage set close together on the branches. Tiny clusters of white blossoms in the early Spring followed by berries. Fine for mass plantings, screens, background and as specimens. One of the most desirable of our own originations, and attracted our attention by its recurved and crinkled leaves, and the glistening foliage. This is the hardiest of the Lucidum family.

Griffing's Waxleaf Privet

GRACEFUL L. lucidum gracilis

Broadleaf Evergreen Shrub. Pyramidal growth, heavily branched. Dark green, medium size, pointed, glossy leaves grow very thickly on upright curving branches.

PYRAMID

L. lucidum pyramidalis

Broadleaf Evergreen Shrub. Upright pyramid growth. Very large, thick, dark green leaves, which grow upward on the upright stems. This and the Blackleaf Privet have the darkest green leaves of the Lucidums. Typical of its name, "Pyramid," it grows entirely upright, similar in shape to the Lombardy Poplar. It can be used in places where a tall slender plant is desired. Also the hardiest of the Lucidums.

UPRIGHT

L. lucidum erecta

Broadleaf Evergreen Shrub. All branches form into a compact upright shape, the small limbs and leaves shaping in the same general manner. The dark green, glossy foliage is quite outstanding, with clusters of white flowers, followed by blue-black berries which hold late into the winter. Excellent for background plantings, screens, and points where a tall growing Evergreen is desired. This is another of the Griffing selections, chosen from many other Lucidums as being one of the best Evergreen glossy Broadleaf varieties.

YELLOWLEAF

L. japonicum aureafolium

Broadleaf Evergreen Shrub. Tall, pyramidal habit. Large, golden yellow, oval leaves, very striking in groups or banking where color contrasts are desirable.

Class	Min.	Height	xx	xxx
R&B 4	ft.	\$ 2.80	\$ 4.00
R&B 5	ft.	4.00	6.00
R&B 6	ft.	6.00	8.00
B&B 7	ft.	8.00	12.00

SENISA *Leucophyllum*

SILVERLEAF *Leucophyllum texanum* Bushy, compact habit. The small, oval leaves are ashen-gray or silver color. After rainy periods a profusion of very showy orchid flowers heighten the effect of the silvery leaves. This shrub requires a well drained soil, and is used principally in foundation groups, masses, as individual specimens, and often for hedges. Very attractive when used in contrast with green foliage.

VIBURNUM

Viburnums are most useful in the general Landscape throughout the Southwest. We find many uses for the different varieties in foundation groups, in the open lawn as Specimens and in background plantings. Most unusual about this evergreen type of shrub, they can be grown equally as well in full shade as in the open sunshine.

BIGLEAF (Japonicum) *Viburnum macrophyllum*

Fast growing variety excellent bright green foliage, upright habit of growth, reasonably compact.

Class	Min.	Height	xx	xxx
B&B	5 ft.	\$ 5.40	\$ 6.80
B&B	6 ft.	6.80	9.60
B&B	7 ft.	9.60	12.00

SPECIMENS 8 ft. up \$15.00 up.

SANDANKWA *Viburnum suspensum*

Compact, bushy habit of growth. A handsome shrub with ovalish leaves, toothed toward the tip. Flowers are dense clusters or panicles, of pinkish color, followed by Red Berries. A fine shrub for use in low groups.

Class	Min.	Height	xx	xxx
B&B	15 in.	...	\$ 2.40	\$ 2.80
B&B	18 in.	...	2.80	3.90
B&B	2 ft.	...	3.90	5.70
B&B	2 1/2 ft.	...	5.70	7.20
B&B	3 ft.	...	7.20	8.40

Sandankwa Viburnum Specimen

Sweet Viburnum

SWEET VIBURNUM *V. odoratissimum*

Compact, pyramidal growth, branching close to the ground. Leaves are large, oblong and pointed, polished dark glossy green. A slight red dened tint is often noticeable in the leaf during the winter season. Flowers are creamy white, resembling the Trailing Arbutus, from February to March. One of the most valuable Broadleaf Evergreens in the South. Should be extensively used in groups, screens, and as specimen plants. Grows well in all locations and all classes of soil.

Class	Min.	Height	xx	xxx
B&B	18 in.	...	\$ 1.50	\$ 1.90
B&B	2 ft.	...	1.90	2.60
B&B	2 1/2 ft.	...	2.60	3.60
B&B	3 ft.	...	3.60	4.70
B&B	4 ft.	...	4.70	6.50
B&B	5 ft.	...	6.50	8.90

SPECIMENS 7 ft. up \$12.00 and up.

CONIFEROUS EVERGREENS

Needle-leaved and cone-bearing trees, including many varieties, among which are Arborvitae, Cypressess, Cedars, Junipers and Pines. Conifers when properly placed add more distinction as well as age and beauty to a planting. Their growth is so slow that they never outgrow their place. The lower limbs of Conifers should always be allowed to remain, for in removing them the natural beauty is destroyed.

BAKER'S PYRAMID

T. or. bakeri

MAURINE T. or. maurineana

Tall upright dark green pyramid of unusual quality. One of our originalities widely used as Pyramid type.

Class	Min.	Height	xx	xxx
B&B	6 ft.	\$ 5.50	\$ 7.00
B&B	7 ft.	7.00	9.80
B&B	8 ft.	9.80	12.40

ARBORVITAE—

Thuja orientalis

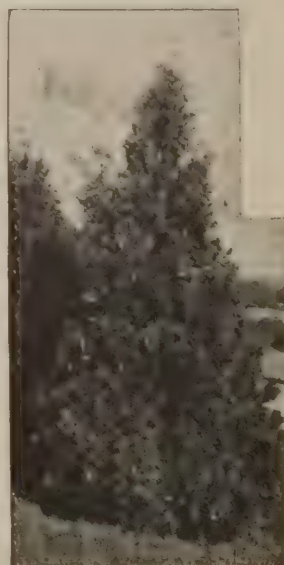

There are two types of Arborvitae, which are known as Occidental and Oriental. The Occidentalis are generally not suited for the Southern States, while the Orientalis or Chinese types all do well in the South. The Oriental type is also classed as "Biota," which is now unapproved.

EXCELSIOR

T. or. excelsior

Symmetrical pyramidal habit of growth. Foliage is very soft and lacy, light green in color. Makes a very dense compact growth, and resistant to blight. Best selection for use in Coastal area.

Class	Min.	Height	xx	xxx
B&B	4 ft.	\$ 3.80	\$ 5.00
B&B	5 ft.	5.00	7.00
B&B	6 ft.	7.00	10.00

JUNIPERS --- Juniperus

The Junipers comprise a LARGE and varied group of SMALL OR DWARF TREES, including TRAILING forms, which make a SPREADING MAT of green ON THE GROUND; WIDE SPREADING, SEMI-PROSTRATE varieties with horizontal branches, PYRAMIDAL OR COLUMNAR forms and good sized TREES. The Junipers are LONG LIVED, hardy, and of easy growth.

ARMSTRONG J. communis

A bushy upright tree with many branches, and soft grayish-green foliage, forming a broad dense head.

ASHFORD

J. communis ashfordi

Silvery-grayish green foliage, turning into a purple-bronze during the winter. Its rugged appearance makes it useful in naturalistic plantings, and an accent in rock garden plantings.

Class	Min.	Height	xx	xxx
B&B	4 ft.	\$ 4.00	\$ 6.00
B&B	5 ft.	6.00	8.00

BURK'S RED CEDAR

J. virginiana burkii

Similar to Juniper Virginiana Glauca, except finer foliage and more compact growth. Maximum height 15 feet.

B&B	6 ft.	\$11.00
B&B	7 ft.	13.00
B&B	8 ft.	19.20

Cannarti Juniper

CANNART REDCEDAR

J. virginiana cannarti

Grafted on the Southern Type Red-cedar understock.

Pyramidal habit, broad at base, tapering to slender top. Irregularly branched in natural growth, but when sheared makes a dense rich pyramid, with dark green cedar-like foliage. Withstands all weather conditions. The dark green tufted foliage gives a twisted effect that makes it distinctive from the cedar family. Cannarts are used in the finest gardens, as specimens on the lawn, in foundation groups or in masses. When liberally used in plantings, they add stability and value.

Class	Min.	Height	xxx
B&B	5 ft.	\$ 9.75
B&B	6 ft.	11.80
B&B	7 ft.	14.80
B&B	8 ft.	16.50
B&B	12 ft.	30.00
B&B	14 ft.	34.00
B&B	16 ft.	40.00
B&B	18 ft.	47.00

COROMBOSA JUNIPER

J. Corombosa virdis

Rich dark green smooth leaf, foliage, formed in a uniform growth. beautiful upright pyramid habit.

Class	Min.	Height	xx	xxx
B&B	5 ft.	\$ 8.75	
B&B	6 ft.	11.25	

DWARF BLUE JUNIPER

J. Chinensis virdifolia

Forms a natural, perfectly shaped pyramid without shearing. Beautiful blue-green foliage, lying closely together. This is a new variety which has not been officially named, but is called by its descriptive name "Dwarf Blue". One of the finest Junipers. It can be used in the most conspicuous places in Formal Gardens, or in foundation plantings.

Class	Min.	Height	xx	xxx
B&B	4 ft.	\$11.50	
B&B	5 ft.	14.50	
B&B	6 ft.	19.75

GOLDTIP JUNIPER

J. vir. elegantissima

Spreading habit. The older foliage is green in spring and summer, changing to dull gold in the fall. Young, tender tips are bright gold.

Class	Min.	Spread	xx	xxx
B&B	6 ft.	\$ 8.00	
B&B	7 ft.	11.00	
B&B	8 ft.	13.00	

GOLDTIP PFITZER

J. chi. variegata

Specie of the Pfitzer Juniper with decided Golden Tips to new foliage.

Class	Min.	Spread	xx	xxx
B&B	18 in.	\$2.75	
B&B	2 ft.	3.75	
B&B	2 1/2 ft.	5.50	

KETELEER JUNIPER

J. vir. keteleeri

Upright, rapid grower, dark green foliage. A splendid pyramidal type.

Class	Min.	Height	xxx
B&B	5 ft.	\$ 7.20
B&B	6 ft.	9.60

NUMBER 103 JUNIPER

J. chi. New Hort. variety

Dark Green, vase-shape habit of growth.

Class	Min.	Height	xxx
B&B	3 ft.	\$4.00
B&B	4 ft.	6.00
B&B	5 ft.	7.50

CREEPING JUNIPERS

GRAY CARPET JUNIPER

J. chinensis procumbens

Spreading habit, branches lying closely on the ground. Blue-green feathery foliage. Grows best in sandy loam soil. Makes a dense mat, clinging closely to the ground. Good for border plantings, in low beds, and in rock gardens.

Class	Min.	Spread	xx	xxx
B&B	18 in.	\$2.40	\$ 3.00
B&B	2 ft.	3.60	4.50
B&B	2 1/2 ft.	5.25	6.75
B&B	3 ft.	6.75	9.75
B&B	4 ft.	9.75	10.90

PFITZER JUNIPER

J. chi. pfitzeriana

The most handsome and popular of the Spreading Junipers. Naturally low, flat spreading form, broad and picturesque, showing unusual grace and charm, with fern-like branches, lying close to the ground. Its foliage is beautiful and feathery, bright green with blue-gray tinge. Excellent in all kinds of soils and weather conditions. Its flowing lines are especially valuable in all plantings.

Class	Min.	Spread	xx	xxx
B&B	2 ft.	\$ 2.80	\$ 3.50
B&B	2 1/2 ft.	3.50	4.80

Parkway Memorial Planting which is rapidly taking shape, featuring Sylvester Junipers, Compact Elaeagnus, and Pfizer Juniper—a lasting result of a Civic Landscape Planting project.

SILVER REDCEDAR**J. va. glauca**

Sometimes called "Blue Cedar", grafted on Southern Redcedar understock. This Silver color is wonderful for the Landscape job.

A dense pyramidal form when sheared occasionally. Has many uniform recurved branches. Its silvery color is very attractive. Grows well in all classes of soils and climatic conditions.

Its slow growth makes it desirable for many uses. Attractive when used as lawn specimens, and for accent purposes in groups and foundation plantings. The richness of color and its fine quality commands high respect for its use in choice plantings.

Class	Min.	Height	xxx
B&B	10 ft.	\$13.00

**SYLVESTER****Juniper chinensis femina**

Coniferous Evergreen. Loose pyramidal, with irregular spangled upright habit, **branches weeping at the tip**, in its natural form. The **needle-like foliage has a steel-gray color**; rather unusual feathery effect, grayish in center of plants, light green, with older foliage a rich dark green. Thrives in **all kinds of soil**, wet or dry; withstands heat, drouth, and all weather conditions.

This makes a **fine specimen** on the open lawn, for the **accent points** in foundation plantings, in masses and groups. Withstands shearing beautifully, and can be **shaped into any form**. Its real beauty is in its **natural, irregular, sideling effect**.

Class	Min.	Height	xx	xxx
B&B	4 ft.	\$ 4.90	\$ 5.80
B&B	5 ft.	5.80	7.00
B&B	6 ft.	7.00	8.50

B&B	18 ft.	22.00	25.00
B&B	20 ft.	25.00	35.00

The Sylvester Juniper naturally forms a sideling effect, but can be pruned or sheared to any desired shape.

For black waxy or light sandy soil, the Sylvester is the best all around Juniper, as it can be used in so many places. It always maintains a dark green appearance, is easy to grow, and always presents a pleasing effect. Should be planted wherever a Coniferous Evergreen is desired.

Junipers used effectively in Parkway planting.

SCHOTTI REDCEDAR (Natural Growth)**J. vir. schottii**

Grafted on Southern-type Redcedar. They are uniform. Pyramidal habit with irregular branches. Light green tufted foliage.

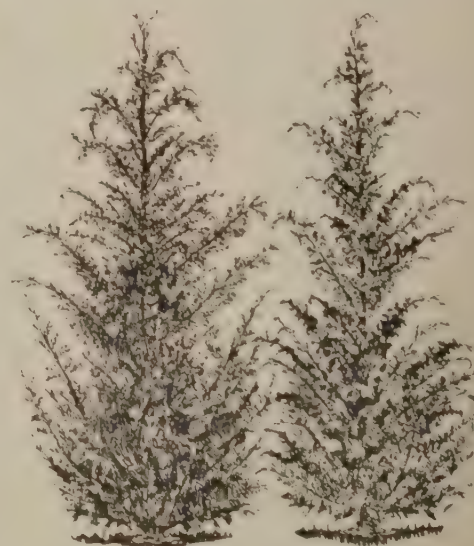

Pyramidal habit, with irregular branches. Light green, tufted foliage, the **lighter green** foliage giving contrast. Perfectly hardy. Useful in groups or mass plantings anywhere.

Class	Min.	Height	xxx
B&B	10 ft.	\$15.00

MIMOSA (Silk Tree)

✓ GRIFFING'S
WATERMELON RED
CRAPE MYRTLE

Flower heads are distinctive on this variety, making it superior in color and size to all of the Crape Myrtles.

LAVENDER CRAPE MYRTLE

✓ CRAPE MYRTLE, IMPERIAL PINK

CRAPE MYRTLES, "The Lilac of the South," come in a range of colors, from a light pastel shade of pink, lilac, rose, white to a deep dark watermelon red and purple. Most desirable flowering tree or shrub for the whole Southwest, as they are easy to grow and bloom over a long period of time. Offered in Bushy plants and Standard Tree shapes in all sizes.

FLOWERING SHRUBS

The greatest majority of brilliant flowering shrubs and other ornamental varieties lose their foliage in winter (Deciduous). For gorgeous color displays they should be promiscuously used in landscape plantings. Their winter barren period is brief in our Southern section and their color changes in autumn make the absence of leaves in winter less lamented. Usually flowering shrubs are best planted in groups of 3 to 20 or more. They are far more effective in this way than planted singly. Put enough of one kind to make a little picture in the landscape when in bloom or when the leaves take on the autumn color, or the fruit and berries have ripened. With enough evergreens to keep the planting cheerful in winter, Deciduous shrubs should be generously used in the South. Pruning should be done immediately after blooming season, cutting the fading blossoms away. Pruning too late or when dormant will sometimes interfere with blooming the following season.

Flowering shrubs can be handled when dormant with bare roots. Better results are usually had with B&B plants. For early or late planting and even mid-summer plantings, B&B shrubs will grow luxuriantly. Try them and see what excellent results you obtain.

CRAPE MYRTLES

DWARF BLUE

L. i. corrulea nana

Deciduous Flowering Shrub. A new variety of rare beauty. Of low growth with distinctive blue flowers. Dwarf habit. Very desirable.

LILAC

L. i. lilac

Deciduous Flowering Shrub. Dwarf habit. Rounded, bushy top. The light pastel shade of lilac flower is quite delicate and attractive.

DWARF PINK (Sneed)

L. i. rosea

New dwarf type of shrub which is low spreading in habit of growth, with a pastel shade of pink flowers.

IMPERIAL PINK **L. i. rosea**

Deciduous Flowering Shrub. The light pastel shade of this variety is excellent in many locations. Flowers are borne in very large clusters.

LAVENDER

L. i. lavandula

Deciduous Flowering Shrub. The flower heads are large size, of clear, bright orchid-lavender—not the common dingy purple ordinarily seen.

PRIZE WINNING CRAPE MYRTLE FLOWERS

Through the growing interest of the Crape Myrtles in the South, the first show was held in the City of New Orleans in the Spring of 1945, and many new and unusual types were exhibited as are now grown in the Gulf Coast area. We furnished Exhibits of our selections for this Show, and received two ribbons as prizes on them. The Imperial Pink Crape Myrtle Flowers took second place, and for the entire Exhibit of assorted varieties brought us the Honorable Mention Ribbon.

Griffing's Watermelon Red Crape Myrtle

Interplanted with evergreens, beautiful effects are obtained. Massed in groups of any size, a display of color unrivaled is had the first summer. The most generous usage and the demand of recent years indicates ITS GREAT POPULARITY.

CRAPE MYRTLE

We grow most of ours in Balling soil—it pays to ball them. Write on order if single stem, many stems from ground or if bushy plants are wanted.

BALLED and BURLAPPED CRAPE MYRTLES transplanted with unusual success from our Balling soil, to live, grow, and blossom heavy the first season. Why not give immediate effects this way? With the wide variety of colors to select from, they can be used extensively in the Landscape. B&B Crape Myrtle transplanted into cold climates with success, whereas bare-rooted plants winter kill.

The favorite Flowering Shrub of the South. A hardy and heavy bloomer; it paints the landscape in the summer months with its brilliant blossoms in tones of crimson, red, pink, purple, and other shades. Frequently termed the "Lilac of the South." Inter-planted with evergreens, beautiful effects are obtained. Massed in groups of any size, a display of color unrivaled is had the first summer. The most generous usage and the demand of recent years indicates its great popularity.

MAGENTA—RED

L. i. magenta

Deciduous Flowering Shrub. This is a new dark, rich red, which is very outstanding. Flower bracts are very large and showy.

WATERMELON RED

Griffing's

L. i. rubra

Deciduous Flowering Shrub. The Watermelon Red or cerise color so much desired is very pronounced in this variety. The flower heads are exceptionally large and fluffy, the color rich, clear and bright. No shrub makes such a gorgeous display in a planting as this. The compact natural growth is easily controlled by pruning so as to make a very dwarf plant. Our type is recognized as being the best type on the market.

The most desirable of all Crape Myrtles.

Crape Myrtles dug B&B from Griffing's heavy black soil transplant easily, and bloom heavy the first Season. Try them!

CRAPE MYRTLE

Cont'd.

WEeping PINK

L. i. prostrata

Delicate Pink. Excellent for Wind-ows or around ends of Parkways. Measured by spread up to 5 ft.

The weeping habit of growth of this shrub makes it quite unique for use in various areas in Landscape plantings. Branches spread close to the ground, except those on stems branched high which make an umbrella top.

Class	Min.	Spread	xxx
B&B	4 ft.		\$ 2.50
B&B	5 ft.		3.60
B&B	6 ft.		4.90

STANDARD TREE SHAPE:

Class	Caliper	Min.	Height	xxx

B&B	1 1/2 in.	10 ft.		8.50
B&B	2 in.	12 ft.		11.00

Griffing's Watermelon Red Bushy Type Crape Myrtle in planting.

STANDARD CRAPE MYRTLE TREES

Crape Myrtles have many uses in the Landscape, both in bushy plants and in Tree shapes. We offer plants of both types, and highly recommend them for extensive use throughout the Southwest for satisfying results.

Field of Griffing's Standard Crape Myrtle used in Landscape plantings.

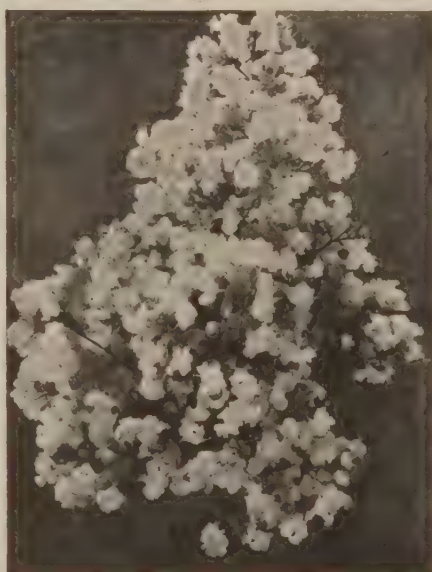

STANDARD TREE FORM—Trimmed to Single Stem. WE HAVE ALL VARIETIES LISTED ABOVE.

We offer the foregoing varieties of Crape Myrtles in Standard or Tree Shape form so useful in landscape plantings. These have been pruned to a single stem to be grown on as a tree instead of a bush.

These trees will develop heavy growth the first year and put on nice flowers, continuing to develop wider tops each season thereafter.

White Crape Myrtle

WHITE *L. i. alba*

Deciduous Flowering Shrub. A pure snow white, bright and very fluffy. A fitting companion for the blue and Watermelon Red, where striking effects are desired.

Class	Caliper	Min.	Height	xx	xxx
B&B	1 1/2 in.	7 ft.		\$ 5.40	
B&B	2 in.	9 ft.		7.80	

PRUNE EVERY WINTER

PRUNE EVERY WINTER: For best results Crape Myrtles should be cut back to One Foot of the ground when planted. By using B&B in big sizes you get better root systems. Then every year thereafter, prune them back to within two to four in. where they were the year before. In this way you get much larger flowers, thick branches, and dense foliage.

We grow most of ours in Balling Soil—it pays to Ball them. Write on order if Single Stem, or if Bushy Plants are wanted.

CORAL BERRY—*Symphoricarpos orbiculatus*

(INDIAN CURRANT)
(BUCKBERRY)

(*S. vulgaris*)

Erect branching habit. Small ovalish leaves, pale green, and hairy beneath. Flowers white. Fruit reddish-purple borne profusely, remaining on the plant all winter.

Class	Min.	Height	xx	xxx
B&B	2 ft.		\$ 1.25	\$ 2.00
B&B	3 ft.		2.00	2.80

WHITE FLOWERING DOGWOOD thrive best when grown in well-drained sandy loam soil. They do not live or survive long when planted in heavy black land. Take this precaution in proper location and get results in your planting of this Shrub.

DOGWOOD WHITE FLOWERING

Cornus florida

Upright grower, head forming a canopy effect. Foliage light green, changing to bright scarlet and amber in autumn. Flowers are large and white, borne in masses, and appearing in the early Spring. Scarlet berries are very showy during the Fall and Winter. Useful in massive groups and naturalist plantings. Plant in sandy soil only.

Class	Caliper	Min.	Height	xxx
B&B	1 1/2 in.	5 ft.		\$ 5.00

Double Reeves Spirea In Full Bloom.

THUNBERGI**Spiraea thunbergi**

Semi-spreading habit; arching branches. Delicate tiny fresh green leaves. In the Spring, small button-like white flowers appear, followed by new lacy green foliage.

Class	Min.	Height	xx	xxx
B&B	4 ft.	\$ 2.50	\$ 3.00
B&B	5 ft.	3.00	4.50

SKYFLOWER—**Duranta plumeri**

Green foliage; flowers in clusters of lilac color followed by yellow berries in clusters.

Class	Min.	Height	xx	xxx
B&B	3 ft.	\$ 2.90	
B&B	4 ft.		3.90

BAMBOO, GRASSES & SOTOL

BAMBOO — Bambusa

The Bamboos deserve far more attention than they usually receive from Landscape Gardeners. Both large and small forms, they can be chosen for any location. Dense, plume-like foliage, entirely evergreen, makes them ideal specimens on lawns and in parks where they are generously used. Certain varieties make beautiful screens for hiding garages and outbuildings and obstructing unsightly views. The dwarf type is adapted to hedge planting and should be used for property lines, separating lawns and flowers or vegetable gardens, or for enclosing any area which is suited to hedge plantings. Hardy, cheaper than fencing, evergreen and unusually beautiful, we heartily endorse and recommend dwarf Bamboos for any hedge where it can be two or three feet wide.

USE BAMBOO EXTENSIVELY

There are many uses which can be made of the Bamboo in general plantings in this area.

The many varieties make an interesting selection in habit of growth and color. The Bamboo is used extensively in screen plantings, formal clipped hedges, in mixed-border plantings, and as specimens in the lawn. Also useful in wind-breaks for the pasture and in retaining walls to hold soil from erosion.

Bamboo Makes Nice Specimen on the Lawn or Very Effective for Screenings.

ALPHONSE KARR

B. nana alphonse karri

Attractive soft-green foliage with stems of golden yellow, green stripes lengthwise.

FEATHER

B. Vulgaris

Strong grower, Dark green feathery foliage, green stems.

GIANT

B. dendrocalamus

Large growing, green-stemmed, open growth, wide long leaves.

GOLDEN Phyllostachys aurea

Stems golden, large grower, graceful green foliage.

NINGALA

Chimonobambusa falcata

Dwarf habit. Evergreen Reed. Many small canes, low growing graceful arching effect. Foliage light green with tips of leaves curled. Yellow stems. Effectively used as Clipped Hedges.

SILVERSTRIPE

Pleioblastus simoni variegatus

Leaves have a Silver stripe lengthwise—Stems golden yellow.

Class	Min.	Height	xxx
B&B	15 in.	Clump 5 ft.	\$ 2.60
B&B	18 in.	Clump 7 ft.	3.90
B&B	2 ft.	Clump 9 ft.	5.25
B&B	3 ft.	Clump 12 ft.	7.50

Balled but not Burlapped, less 25% off B&B prices.

BAMBOO HEDGES ARE MOST EFFECTIVE TOO

We use the Bamboo extensively in planting hedges, where they can be pruned back to a uniform size or allowed to grow into a natural growth. For a higher hedge we recommend the use of Alphonse Karr or Feather variety, but for a small compact growing hedge, we recommend the Ningala variety.

Hedge Size Bamboo Clumps—Tops pruned

Eulalia Grass

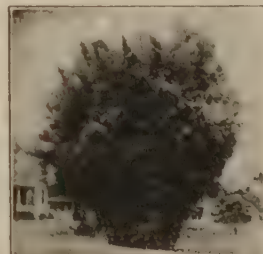

Pampas Grass

SOTOL — Dasyliirion SAWTOOTH

Dasyliirion serratifolium

Dark green, narrow saw-tooth leaves, resembling a Yucca. Older plants have a larger number of symmetrically arranged deep green leaves. A small brown colored spike to 8 feet, terminating with about 2 feet of yellowish-cream flowers which have very prominent stamens, is produced during the early summer. Good for desert gardens.

Class	Min.	Spread	xxx
B&B	2 ft.		\$3.00
B&B	3 ft.		4.50

Large clump of Bamboo

SOTOL

Both Bamboo and Ornamental Grasses are useful in the Landscape. Widely used in Screen plantings, Hedges, Borders and high Wind-breaks.

Bamboo along Fence Line for Screening is Most Desirable

GRASSES—

ORNAMENTAL

PAMPAS GRASS

Cortaderia argentea

Beautiful light green foliage, gracefully recurved. In the summer this Grass sends up tall, silvery plums 2½ ft. long, and 1 ft. wide, which are very distinctive and beautiful in both form and color.

PINK PAMPAS GRASS

Cortaderia argentea

Beautiful light green foliage, gracefully recurved. Sends up tall plumes in the summer, which have a pinkish hue, and very attractive.

Pampas Grass

Cl. Fig. Vine

YUCCA AND VINES

A Vine covered pergola makes a worthwhile addition to any garden. A careful study of your grounds will show immediately where Vines can be used to achieve beautiful effects. Be sure to make the right selection for the spot as some vines and creepers will thrive better than others, and color harmony is an important feature.

Do not allow your vines to cover entirely a well designed doorway or window. Let them frame the good features of the house and cover its architectural defects.

Training or trimming should be shrewdly done to keep the naturalistic effects, which vines give to a house planting.

YUCCA CURVELEAF *Yucca recurvifolia*

Wide flat graceful drooping leaves. Flowers borne in large trusses on tall red stems in Spring and Fall Season.

Class	Min.	Spread	xxx
B&B	2 ft.		\$2.00
B&B	3 ft.		3.00

YUCCA PLANTING

An attractive and interesting group, using Yuccas, Century Plant and Cactus. For arid sections or desert gardens these plants are ideal planting.

1 yard cut 2x2" planted 18"		
apart plants 36x36 feet		

HOW TO PLANT ST. AUGUSTINE GRASS LAWNS

The St. Augustine Carpet Grass has come to be the most favored for the lawn of the home grounds throughout the Southwest. It does make a marvelous lawn grass, and once a good lawn, it continues to be attractive.

The most successful method of planting it is to prepare the soil to the desired level, then cut the sod into small clumps 2½ or 3 inch squares and plant on 12 to 15 inch centers over the entire area. Apply 1½ teaspoonsful of commercial fertilizer in hole before planting under the clump of grass. Thoroughly pack grass into hole and keep well watered. Mow lightly tall stems until its sends out runners to cover the lawn surface, then keep cut regularly to any desired level.

Palms Used in the Landscape of Southern Estates

FOR TROPICAL BEAUTY, THEIR PLANTING WILL INCREASE THE BEAUTY OF YOUR HOME.

Palms are measured and graded by the **THICKNESS OR DIAMETER OF THE TRUNK** where it protrudes from the ground. From 40 to 60 per cent of the leaves are cut off when dug. After new growth starts, fertilize liberally with stable manure and water freely and your Palms will give pleasing results.

Our Palms grow very stocky in the heavy black land, having strongly developed leaves and large, thick, pronounced trunks. More leaves according to caliper than on the palms grown in thick rows.

BLACKBURN

Sabal Blackburniana

Fan-shaped leaves; hardiest of all Palms, can stand almost zero temperature without injury.

Class	Caliper	Min. Ht.	XX	XXX

NOTE—For Trunk above 4 ft. add \$4.00 per foot!

SEMI-TROPICAL PALMS

PALMS

Nothing makes our Southern towns more **INVITINGLY TROPICAL**, especially in the eyes of our **NORTHERN VISITORS**, than the Palms, at home in **OUR MILD CLIMATE**. Lofty palms lining an avenue suggest stability and dignity. A careless grouping of palms with other evergreens makes for an **EFFECT OF LUXURIANCE** that **NOTHING ELSE** can create.

Every home can have a few Palms. They enhance **PROPERTY VALUE** and are the greatest asset in beautifying. On small grounds, they **WILL THRIVE** where other trees will not, because their root systems do not require much space.

PINDO PALMS

Cocos australis

Coconut Palm growth. Leaves similar to Date Palm. It's long drooping leaves blue-green color are very attractive. Very hardy, will stand the ordinary cold weather inland 100 miles from the Gulf. Bears edible fruit in early Summer.

SPECIFY PRUNING REQUIREMENTS!

For the best results in planting Oak trees, we urge you to let us use our best judgment in pruning the tops when we dig your orders for shipment. Full tops left only at purchaser's special request and risk. We recommend stripping of all leaves and thinning out small limbs.

PRUNING OAKS

Our Oaks are given careful attention, all FORKS BEING CUT out, with the CENTER STEM retained, forcing all branches to come out horizontally from the main trunk. With this training, the center stem continues to grow upward, and the horizontal branches form a beautiful tree.

As the tree grows older, the side branches predominate, making the tree broader with age, and TRULY MAJESTIC in its beauty. When trees are trained in this way, in case of a storm, there are not a lot of forked branches at the trunk to cause the tree to split and ruin its shape.

WE DO NOT RECOMMEND THE COMMON PRACTICE OF "TOPPING" OAK TREES.

XXX Grades—Defoliate and remove branches under 1/4 in. size.

XX Grades—Defoliate and prune branches 1/2 or more.

B&B SPANISH LIVE OAKS READY FOR LOADING

Our orders for Live Oak trees are dug promptly from our large fields of trees. After they are B&B (Balled and Burlapped) and wired if necessary, we haul them to the Railroad siding to be loaded onto Railroad cars for shipment. Trees are pruned and ready for shipment before they leave the field.

Everlasting.**

DECIDUOUS OAKS

PIN OAK *Quercus palustris*

Deciduous Shade Tree. This is the Northern type of Pin Oak, which is very similar to the native Spanish Oaks in West Texas. Large forked leaves of rich green color, changing to scarlet in the Fall. Rapid grower. Our trees have exceptionally straight trunks and shapely heads.

RED OAK *Quercus rubra*

Large leaf, deciduous, however turns brilliant scarlet in Fall before it sheds its foliage.

WILLOW OAK

Quercus phellos

Deciduous Shade Tree. Upright growth with uniform rounded heads. Smooth bark, uniform straight trunks; vigorous growing tree, especially adapted for wet or damp places. The leaves are long and narrow. Erroneously called Southern Pin Oak.

VIEW OF SPANISH LIVE OAK TREES IN FIELD

WATER OAK

Quercus nigra

Deciduous Shade Tree. In the South, its foliage does not shed until a heavy freeze. Some seasons it stays evergreen along the Gulf Coast the whole year. A tall growing tree, with rounded uniform top. The upright branches and straight trunk makes this tree desirable for shade and street planting.

SPECIMEN LIVE OAK

PLANT EVERGREEN LIVE OAKS

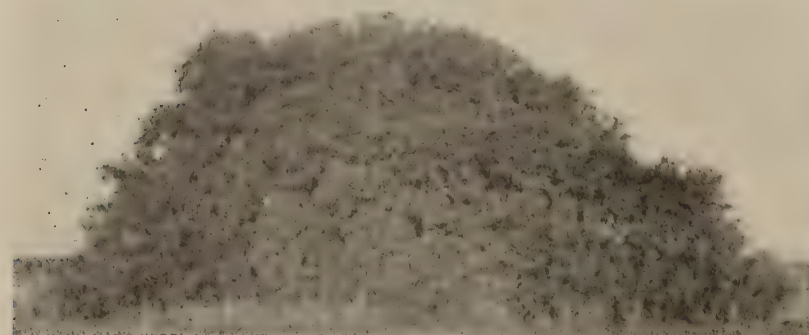

SAVE A GENERATION! PLANT LARGE OAKS!

LIVE OAKS are rapidly becoming the most popular Tree in the South, because they are evergreen, and because they make such a shapely tree for any purpose they may be used. Our SPANISH TYPE of LIVE OAKS are the fastest growing variety, but even then it takes SEVERAL YEARS for a small tree to grow large enough TO GIVE SHADE.

There is nothing more beautiful than the true "Spanish" Live Oak. This type has thick, dark green, oblong, pointed leaves that glisten in the sunlight, the under side being a grayish-green color.

Experimental reports have been made by Experiment Stations after several years of study on suitability of soil for growing Live Oak trees. The tests show that they will grow on any kind of soil equally as well as on another, whereas, deciduous Oaks can only be grown on sour soil. Tests have also been made that Spanish Live Oaks ARE NOT susceptible to Texas Cotton Root Rot.

LIVE OAKS MASSED IN LARGE CLUMPS For Beauty and Wind Breaks

LIVE OAK (Spanish Type) *Quercus virginiana*

Evergreen shade trees. **Nursery grown** Live Oak Trees **live** and thrive under all conditions when the Trees have been root-pruned and properly Balled from the right kind of balling soil and pruned properly before they are dug.

We have the **complete stock** from Acorns gathered in Florida from the choicest **isolated grove** in existence, so there is not a chance of **hybridizing**. This true type of **fast-growing** Oaks are destined to revise the idea that Live Oaks are a **slow growing tree**, much different from the ordinary native Live Oak in Louisiana and Texas, which we call the **Scrub Live Oak**, but take too long to grow.

Always clean, rich green foliage. Very straight bodies. From young seedlings we **trim to single stem** in center.

OAKS are EVERLASTING for SOUTHERN PLANTINGS.

The Shade Trees of the South, nothing can compare to the Majesty of the Oaks—because of their ...Longevity, ...everlasting beauty and Rapid Growth, the Oaks are now preferred to all other Shade trees.

Whether along the Avenue or Boulevard, the highly traveled Highways, in our Parks and Playgrounds, on Plantations, or amidst the surroundings of Your Own Home Grounds; the Oak tree lends forth its welcome arms to Shelter Us from Biting Winds and the Hot Summer Sun.

A charge is made for this Wiring according to the size of the Tree, which will be quoted upon request any time.

Fast Growing Evergreen Spanish Type Live Oak

DECIDUOUS AND FLOWERING TREES

(Suitable for Shade and Street Planting)

Shade Trees are a necessity and comfort as well as adornment for the Home and Parkways. The sun is hot in the South, and Shade Trees add comfort to the home plantings. We make a specialty of growing desirable Shade trees, and offer the vast assortment as listed below. Make your selection to fit your requirements. Home Sites where Trees are planted are always most desirable, therefore all new Home Sites should be planted early.

ASH

ARIZONA

Fraxinus velutina

Evergreen Ash Rio Grande Ash

Practically evergreen in the extreme Southern Coastal region. Leaves are a bright, glossy green above, paler beneath. Seeds are small nutlets, partly surrounded by an elongated wing or samara. Trees have a uniform straight trunk with umbrella-shaped top. Young trees are last to shed foliage in the winter, and first to put on new leaves in the spring. Especially liked because of its clean growth, which means no leaf-littered lawn during late summer and early fall.

Class	Caliper	Min. Height	xx	xxx
B&B 2	in. 8 ft.	\$ 6.50	\$7.80	
B&B 2½	in. 9 ft.	8.70	10.00	
B&B 3	in. 10 ft.	11.00	12.80	

Arizona Ash Trees make excellent deciduous shade trees for the Home grounds, in parkways, and as wind-breaks.

BAY TREES

RED BAY *Persea borbonia*

Smooth branches, oblong leaves, glaucous underneath.

Class	Min. Height	xx	xxx
B&B 4 ft.	\$ 1.90	\$ 2.90
B&B 5 ft.	2.90	4.80
B&B 6 ft.	4.80	6.70

SWEETBAY *Magnolia glauca*

Deciduous Flowering Tree. The young leaves are pale green, with silvery hairs; when mature they have a soft leathery texture, bright green and shining above, pale, glaucous beneath, almost white. Creamy-white, fragrant flowers, 2 to 3 inches across. Useful as a shade tree. Prefers loamy or acid soils.

DOGWOOD

WHITE FLOWERING

Cornus florida

Recommended for planting in sandy soil only. Heavy branched stock, Nursery grown.

FOR PRICES — See Page — 24

STANDARD TREE CAPE MYRTLE

The favorite Flowering Shrub of the South. A hardy and Heavy bloomer; it paints the Landscape in the Summer months with its brilliant blossoms in tones of Crimson Red, Pink, Lavender and White. Frequently termed the "Lilac of the South". Beautiful display of color unrivalled the first Summer.

IMPERIAL PINK

L. i. rosea

The light Pastel shade of this variety is excellent in many locations in the Landscape.

LAVENDER *L. i. lavendula*

The flower heads are large size of clean, bright Orchid-lavender — not the common dingy purple.

MAGENTA *L. i. magenta*

A very deep red of outstanding merit. Very rich color.

WATERMELON RED

(Griffing's Type) *L. i. rubra*

The Watermelon Red or Cerise color so much admired. Watermelon Red Cape Myrtle has flowers heads exceptionally Large and fluffy, the color rich, clear and bright. No shrub makes such a gorgeous display in a planting as this. Our type is recognized as being the Best type on the market.

FOR PRICES — See Page — 24

UNIFORM STREET PLANTING MORE EFFECTIVE

Where the same type of Shade tree is used along the Street, you get a more pleasing effect. Try to combine your Tree planting along the Street with that of your neighbors for a uniform Street Tree planting.

WEeping PINK

L. i. prostrata

Delicate Pink. Excellent for banking or under Windows or around ends of Parkways. Measured by spread up to 5 ft.

NOTE: Those listed up to 5 ft. spread close to the ground, where those on stems branched high make an umbrella top.

FOR PRICES — See Page — 24

ELM—*Ulmus*

AMERICAN ELM

Ulmus americana

An attractive Shade tree for the more arid regions. Small leaves; small weeping branches.

CORKBARK SMOOTHLEAF ELM

Ulmus carpinifolia suberosa

Open head tree, smooth dark green foliage.

Class	Caliper	Min. Height	xx	xxx
B&B 1¼	in. 6 ft.	\$ 4.70	\$5.40	
B&B 1½	in. 8 ft.	5.40	6.50	
B&B 2	in. 10 ft.	6.50	7.80	
B&B 2½	in. 12 ft.	8.70	10.00	
B&B 3	in. 14 ft.	11.00	12.80	

SHADE TREES are most inviting in the Summer Time—whether in the Parks, Home Lawns, or in the Wooded area. Trees planted today can be enjoyed in the Tomorrow!

SHADE TREES FORM THE BACK GROUND FOR THE LANDSCAPE.

Large Shade Trees can be safely moved provided they are properly dug and re-planted in place. Griffing's trees do live and grow and give results—and grow more beautiful as they grow older.

GRIFFING'S ROSES

Griffing's Roses are known throughout the Southern States for their High quality and Productiveness. For years we have tested Hundreds of Varieties and selected a few BEST ADAPTED for our Southern Climate and soil conditions.

Our Long Experience has shown us that many varieties have their merits. Customers who patronize us are safeguarded by our years of testing and choosing new Tried Varieties. Therefore, we are listing only the Varieties SUCCESSFULLY TESTED.

ROSE SELECTIONS

For fifty years we have been leaders in growing Roses. In our earlier days we gave attention to quantity production, growing tens of thousands in scores of varieties; however in recent years, we have specialized in a limited list, including those which average home owners can grow successfully without a great deal of attention. This list includes one or two dozen varieties, which, according to our experience, are best adapted to all conditions. These will give ample range of color for selection. The Griffing Roses have been the choice of thousands throughout the Southwest.

Among all the Flowering Shrubs that make for beauty, grace and ornamentation, there is none that can compare with the Rose. The great variety of color, shape and size of the blooms and the diversity and character of the foliage give it a wider range for decoration than any other single group of plants. When added to these qualifications, are ease of culture, quick and ample response in blossoms, it is not to be wondered that the Rose has been aptly termed the "Queen of Flowers".

We realize that most people grow Roses for the flowers alone, and we are listing only Roses that bloom most of the year. Many persons who have had unfortunate experience with mildew on Roses have been agreeably convinced of the advantage of planting carefully selected plants which are not subjected to mildew or blight.

ROSES FOR YOUR GARDEN

Griffing's Selected Roses for the Gulf Coast area. Our long experience has shown us that many varieties have their merits. Many Customers use our Roses because they know we have tested and selected only the best.

EVERBLOOMING BUSH ROSES

BRIARCLIFF—(H. T.) Extra choice selection, strong upright stems producing Rich silvery pink buds, excellent for cut. This is an improved type of the Columbia rose.

CECIL-BRUNNER (Poly.) "Sweet-heart Rose". Dwarf growing type of rose, with small foliage. Covered most of the year with small, exquisitely formed buds and flowers of a light pink shading, very sweet scented. Flowers usually borne in clusters.

E. G. HILL—(H. T.) Flowers are quite large, very full and a brilliant crimson, and as they come singly on strong erect stems, are splendid for cutting. Flowers quite fragrant.

Climbing Roses on a Trellis over the Driveway, or alongside the drive blends lovely into the general Landscape, and adds a wealth of color in the early Spring Season.

ETOILE DE HOLLAND—(H. T.)

The most universally desired dark red Rose. Has brilliant dark red blooms, perfect in half-open buds. Free flowering and very fragrant.

EDITOR MCFARLAND—(H. T.)

Valued selection on account of the lovely form, rich pink coloring. Long buds open to deep pink flowers with delightful fragrance and come singly and erect on the stems. Stands up well when cut.

GOLDEN SALMON—(Poly.) Dwarf

type used in border or group plantings. Blooms almost constantly and very effective wherever used. Has bright orange-salmon flowers borne in clusters.

K. A. VICTORIA—(H. T.) Long,

shapely buds open to full petaled cream white flowers with a slight lemon tint in the center. When fully open the delightfully scented blooms are cream-white. Excellent for cut flowers.

KONIGIN LUISE—(H. T.) Very

large, full double snow-white flower with just a tinge of lemon at the center. An exceptionally fine Rose on a bushy free flowering plant.

LADY HILLINGDON—(H. T.) Deep

apricot yellow to orange shading, long pointed buds, free flowering. Medium growing type of bush, with excellent cut flowers.

MRS. CHARLES BELL—(H. T.) A

Shell pink radiance, shading to Salmon pink as the buds open up. Decided delicate shade, excellent for cut flowers.

ROSE COLORS are illustrated in the color pages of this Catalog—see these pages for your Selections.

PINK RADIANCE—(H. T.) Vigor-

ous grower, free blooming type, bearing long sturdy stiff buds. This is one of the very best selections we have for the Rose Garden planting. Flowers large, rosy carmine on reverse of petals, beautiful silvery tinted pink.

RED RADIANCE—(H. T.) Also vigor-

ous grower, free blooming type, bearing sturdy stiff buds. Flowers clear red with no other shadings. Beautiful in bud or in open flower.

TALISMAN—(H. T.) Upright habit

of growth, producing brilliant orange-red buds, mixed with yellow, opening to a lighter shade. Beautiful cut flowers, or colorful left on the bush.

CLIMBING ROSES

CL. PAUL'S SCARLET—(Cl. H. T.)

Bright scarlet blooms of excellent shape and size borne in small clusters all over the vine. Early blooming, making a mass of color wherever used. Excellent along the fence, on trellis or pruned into massed groups.

CL. TALISMAN—(Cl. H. T.) Vig-

orous type of Vine, with good foliage. Large blooms at intervals during the year, coppery-yellow color in bud, shading to a lighter yellow when open.

SHRUB. ROSES—Under Flowering Shrubs we list the Azalea Roses and Louis Phillipe—two best varieties for Shrub plantings.

FRUIT AND ORCHARD TREES

Orchard Planting

The land that will produce the best farm crops will also produce the best orchards. Rolling, well drained lands are best for all varieties of fruit.

No home, large or small is complete without an assortment of Fruit Trees. We are giving our suggestions for the arrangement of an Orchard Planting to give the greatest number of Trees in a small acreage.

A few fruit Trees, properly selected, planted and well cared for, will produce enough fruit for the average family, with some to sell.

© Pecan—Diagonally planted, 45 to 90 ft.
○ Peach, Plum, Orange, Fig, Kumquat,
Interplanted 15 ft. squares.

BERRIES

What is nicer for the home garden than a berry patch? They have the advantage of coming into bearing sooner than most fruits and certainly nothing is more relished than big, ripe, luscious berries.

Blackberries, Dewberries, Youngberries, and Boysenberries are quite at home in the South, and nowhere are they more productive or the quality better.

BOYSENBERRY—The largest and most productive berry known. Berries very sweet and juicy. They have a mild, distinctive flavor of its own, somewhat suggestive of raspberry. The vines are so heavy, they should have a three-wire trellis five feet high. When planting, allow 6 feet each way for vines to grow and bear properly.

DALLAS BLACKBERRY—A rapid grower. Long thorny vines. Never fails to produce a heavy crop each year. One of the most prolific bearers. Berries are large, luscious, sweet and juicy.

THORNLESS DEWBERRY—A new plant, without thorns. A strong grower. Large jet black berries for eating fresh or canning. Excellent quality.

THORNLESS YOUNGBERRY—Vines are robust, from 10 to 20 ft. long in season. Berries are large purple when ripe, fine flavor, similar to raspberry, sweet, juicy and delicious. Best results are obtained by planting 6 to 7 feet apart in rows 8 feet apart. A two-wire trellis 4 feet high is best for successful cultivation.

Class	Min. Size	Price Each	Dozen
NB	Layered Vines	\$ 2.00	per doz.
NB	Strong Vines	4.00	per doz.

FIGS — Ficus

No fruit is more valuable in the Southern Fruit Garden than Figs. No home pantry is complete without CANNED AND PRESERVED FIGS for winter use. Figs come into BEARING VERY EARLY. If regularly sprayed with BORDEAUX MIXTURE they will hold their FOLIAGE LATE in the season, greatly extending the PRODUCING PERIOD.

CELESTIAL

"Little Sugar Fig"

Ficus species

The Tree is a vigorous grower and prolific bearer. The fruit is medium to small, of bluish to ivory color; flesh is rich, tender and very sweet. So tender you can eat, can, or preserve them without peeling. It is the hardiest variety we have—hence reliable further north. Produces more fruit than any other variety. Generally considered the business fig of the South. Should be grown in tree form.

BROWN TURKEY—

Medium size, coppery brown, flesh pinkish-amber, Excellent flavor.

GREEN ISCHIA—

Medium size, green skin, rosy flesh. Ripens late.

MAGNOLIA

Ficus species

This variety should be trimmed to bush form, as it bears on new vigorous limbs. It should be cut back every spring before budding out, to 5 or 6 buds of where it was cut the year before. The fruit is medium to large, oblong in shape, smooth skin; color, pale yellow with purplish-brown flesh; pulp, dark red. This variety is most used for commercial orchards for preserving purposes.

TEXAS EVERBEARING—

Fruit very large, dark purple, excellent for preserving and when fresh.

Class	Min. Size	Price Each	Dozen
NB	12 in.\$.50	\$ 5.00
NB	18 in.75	7.50
NB	2 ft. 1.00	10.00
NB	3 ft. 1.50	15.00
NB	4 ft. 2.40	24.00

Celestial or "Sugar Fig" Tree. Makes an attractive shrub or bush for the yard or garden.

GRAPES — Vitis TRELLIS VARIETIES— BUNCH GRAPES

Not all Trellis Grapes are at home in the South, but many grow here to perfection, and can be planted in back yards or in commercial vineyards with assurance of prolific bearing.

CARMAN

Vigorous grower and prolific bearer. Fruit grows in large bunches of medium size grapes. Color, black; firm, tender, and extra fine quality. Very rich, superior flavor, seeds easily leaving pulp. A popular standard commercial variety. Ripens about July 15th.

CONCORD

Good grower; full bunches. Very large, round, bluish-black. Sweet. Ripens about July 15th. An old favorite.

NIAGRA

Best white bunch grape. Pale greenish-yellow in color. Tender, juicy and sweet. Fine for table use. Ripens about August 1st.

Class	Min. Size	Price Each	Dozen
NB	Small 2 yr. Vines	\$.70	\$ 7.00
NB	Strong 3 yr. Vines	1.25	12.50

MUSCADINE VARIETIES— ARBOR GRAPES

Fruit clusters not so large as the Bunch Varieties, but the flavor is excellent. Usually trained on overhead arbors 6 feet high, planted 30 to 40 feet apart. Pruning is not required.

JAMES—Borne in small clusters. Grapes are large, purplish-black. Rich, sweet and juicy.

MALE MUSCADINE—The pollinating variety. Should be planted with other varieties for heavier crops.

SCUPPERNONG (WHITE)—Vines produce abundantly. Grapes are large, bronze-colored when ripe. Sweet, pulpy and vinous.

Class	Min. Size	Price Each	Dozen
NB	Mod. 2 yr. Vines	\$1.25	\$12.50
NB	Strong 3 yr. Vines	2.50	25.00

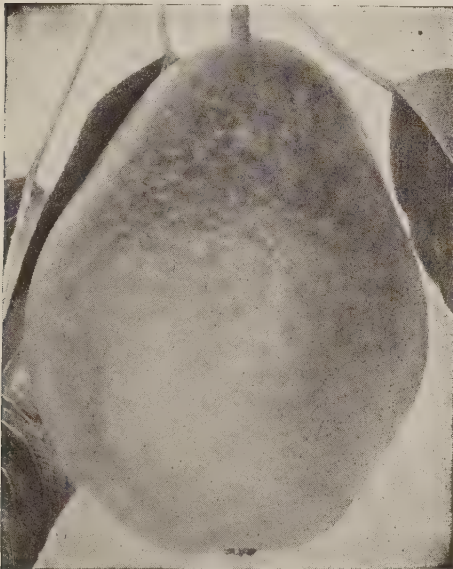

PEARS—Pyrus

Because of blight, the list of Pears adapted for the South is limited. Ours are from "Blight Proof" strains, and are highly resistant, being of the Chinese Sand Pear types.

After the second year, Pears should not be cultivated, but the ground allowed to become hard. They should not be fertilized with nitrogen, but with potash fertilizer only, and mulched heavily.

In order to have the fruit good to eat fresh, it should be gathered green, several weeks before the ripening period. When gathering, care should be taken against bruising. Pears should be placed in a basket like you would eggs, and each pear wrapped separately in tissue paper, and then placed on shelves in a warm even temperature. As they soften, they are juicy and delicious, and will keep this way for several months.

Pineapple Pear for the South

DOUGLAS—A new Pear. Tree is vigorous grower, with upright branches. Large glossy leaves. Fruit is large, slightly oblong in shape, creamy-white with red cheek. Ripens in August.

GARBER—Tree is a rapid grower and prolific bearer. Branches upright, forming a rounded top. A hybrid of the Chinese Sand Pear and one of the fine French varieties. Fruit is large, rounded shape, smooth skin, ripening about August 15th. Ripens fairly well on the tree. Fine for preserving.

PEARS — Contd.

KEIFFER—Tree is a vigorous grower, making a well shaped, upright top. Fruit is large to very large; skin, yellow with light vermilion cheek. Flesh is brittle, very juicy, with a marked musky aroma. Fruit does not ripen on the tree until October or November. Especially prized for canning and preserving purposes.

LE CONTE—Very quick, strong grower, early bearer. Fruit large, pale lemon-yellow. Good shipper and good market variety.

PINEAPPLE—Tree has an upright habit; fast grower. Trees in Southern Alabama are known to have produced 50 bushels per tree. Fruit is very large, light green with red cheek. Does not turn brown when cooked, but holds its white color. Especially fine for preserving and canning. For the lower coastal region, it is the best blight-resisting Pear we know. Ripens in August. Trees form a tall column, and may be used for lining drives, etc. for skyline effects.

Class	Min. Size	Price Each	Dozen
NB	3 ft.	\$ 1.50	\$15.00
NB	5 ft.	2.50	25.00
NB	7 ft. Branched	5.00	50.00

PERSIMMONS—

Diospyus

Where the Persimmon is known on the market it finds ready sale. The cost of cultivation, care and production, is reduced to a minimum.

HYAKUME—

Large to very large, varying from roundish-oblong to roundish-oblate flattened at the ends; skin light, bluish-yellow; flesh light brown; sweet, crisp, and meaty even while hard. A splendid persimmon.

TANE NASHI

The tree is short, stocky grower and long lived. Begins bearing when quite young, and is very prolific. Fruit is large to very large, roundish-conical in shape. Skin is light yellow; flesh is yellow, and of finest quality. Seedless. The finest commercial sort, and the most popular home ripened variety.

YEMON—

Large, tomato-shape; somewhat foursided; skin bright orange-yellow; flesh yellowish; generally seedless; quality good.

ZENGI

Fruit medium size, dark meat, eatable when hard. Long life variety, and heavy bearing tree.

Class	Min. Size	Price Each	Dozen
NB	3 ft.	\$ 1.50	\$15.00
NB	5 ft.	2.50	25.00

COONS LIKE JAPANESE PERSIMMONS TOO

PEACHES—

Amagydalis persica

It is advisable to plant a few new TREES EVERY YEAR on well-drained soil, and NEW VIRGIN LAND. If possible for a continuous home supply. Peaches should be well cultivated, fertilized with NITROGEN WHEN YOUNG, AND POTASH WHEN BEARING. They should be SPRAYED REGULARLY. The varieties we list have been chosen for the Gulf Coast Territory.

CARMEN

Freestone. Large white flesh with red cheek.

ELBERTA

Freestone. Large, oblong, pointed fruit. Yellow flesh and skin with red cheek. Ripens last of July and early August.

FRANK

Freestone. Large size, yellow skin with red cheek; flesh yellow, juicy and good flavor. Ripens in July.

LUTTICHAU

A fine market and table peach. Large, greenish-white, marked with red. Juicy and fine flavored. Freestone. Ripens early in June.

PALLAS

Prolific and regular bearer. Flesh is white, washed with red. Medium size, oblong shape, decidedly pointed. Very sweet. Freestone. Ripens early in July.

RED INDIAN CLING

Fruit medium size, deep red color. Ripens in July. The well-known Indian peach.

WALDO—Freestone. Thin white skin with red flesh. Fruit delicious and very sweet. Excellent for canning and fresh. Ripens in June.

Class	Min. Size	Price Each	Dozen
NB	2 ft.	\$ 1.00	\$10.00
NB	4 ft.	1.50	15.00
NB	6 ft.	2.50	25.00

PLUMS—Prunus

Varieties of Plums suited to the Coastal Section are becoming more widely planted.

BRUCE

A very productive hybrid, originated by Mr. A. L. Bruce. Extra large, red fruit, delicious in flavor. Ripens early in June.

EXCELSIOR—Prolific, regular bearer. Plums are large, round, and purplish red. Ripens early in July. A cross between the Japanese and Chicasaw varieties. This is the best plum for the Coast-wide territory.

GOLD

A prolific bearer. Fruit is of medium size, firm yellow, with a little red. Ripens middle of July.

METHLEY

A very large plum, with greenish-red skin. Red flesh. Deliciously sweet. Best of the early plums. Ripens middle of May.

NONA—Fruit is large, bright red. Flesh is yellow, juicy, high quality. Ripens middle of July.

SIX WEEKS—Sturdy Robust tree. Produces very large, firm bright red fruit. Ripens around May 25th.

Class	Min. Size	Price Each	Dozen
NB	2 ft.	\$ 1.00	\$10.00
NB	4 ft.	1.50	15.00
NB	6 ft.	2.50	25.00

The Pecan is the State Tree of Texas. They should be planted extensively for shade and the nuts are a profitable crop. Trees should be planted 60 ft. apart, requiring 12 trees per acre.

We list only the varieties we can recommend for the Gulf Coast Territory.

Pecan Cultivation

Notwithstanding the fact that Pecan Orchards have been planted heavily throughout the South for a number of years, and there are many thousands of acres now bearing, the outlook is even brighter at present than at any time heretofore. Those who engaged in the industry in the earlier days are reaping rich rewards, and where it might seem that there was a danger of overproduction, the market and demand is growing even faster than production, so that today we find a ready sales for the improved varieties of Pecans at prices even better than they were ten years ago.

There are several reasons why the Pecan offers greater inducements for the commercial planter than almost any other crop. Briefly they are: the Improved Varieties budded or grafted from bearing trees begin to produce crops very early; the tree is long lived; it is fairly free of injurious insects and diseases; the nuts do not have to be sold immediately when gathered, but may be kept for months without the necessity of placing in cold storage.

Cultivate Well and Get Results

We cannot too firmly advocate cultivation of nut trees. You are aware of the large income they will bring you. If you want the best results, it is imperative that you fertilize, spray, and cultivate your trees well and give them excellent care and attention. Without this proper attention, it is impossible to expect good results.

Number of Trees to the Acre

1 x 1 foot	43,500
10 x 10 feet	435
15 x 15 feet	196
20 x 20 feet	108
30 x 30 feet	45
40 x 40 feet	27
60 x 60 feet	12

Time of Bearing

The time of bearing depends upon the care given and the method of fertilizing. It is better to have the tree make a good, sturdy growth and attain fair size before it bears; then the method of care should be changed so as to produce short twigs upon which the nut clusters are borne. This can be done by decreasing the amount of nitrogen and adding potash.

PAPER SHELL PECANS

BIG "Z"— Strong, upright grower, making a rounded head. The peer of all varieties for the lower coastal section. The Big "Z" bears twice as many nuts as any of the old standard varieties in the same grove. It is the only large nut we have observed which bears regularly. The size averages 38 to 40 to the pound. Shell is thin, partitions thin, appearance fine, kernel rich, yellow, crisp, and of fine flavor. Best cracking qualities of any large nut. Very early and prolific bearer.

CURTIS— Tree vigorous, open growth; bears at an early age; very prolific, shell thin, cracking quality exceptionally good. Kernel plump and richest in quantity of any pecan generally planted.

STUART—Tree is decidedly strong, upright grower. Nuts are medium to large, fairly thin shell, and of good quality. Planted more generally than any other variety. Very hardy.

SUCCESS—Tree is a sturdy, vigorous grower, making a broad, full head. Nuts are large, almost round, some larger at the stem end. Shell is of average thickness. Fills well and of good quality. Successful over a wide area.

Class	Caliper	Min. Ht.	Each	Dozen
NB	1/2 in.	2 ft.	\$2.50	\$25.00
NB	3/4 in.	3 ft.	3.50	35.00
NB	1 in.	4 ft.	5.00	50.00
NB	1 1/2 in.	6 ft.	7.50	75.00

MEYHAN—Uniform upright habit of growth, produces very large nuts, which have thin shell. Flavor is fair and cracking qualities fine. Early bearing and extra large nuts. Some measure 2 1/2 inches long.

Class	Caliper	Min. Ht.	Each	Dozen
NB	1/2 in.	2 ft.	\$2.90	\$29.00
NB	1/4 in.	3 ft.	3.80	38.00
NB	1 in.	4 ft.	6.00	60.00
NB	1 1/2 in.	6 ft.	9.00	90.00

BEARING PECANS SAVE TIME—PLANT BEARING SIZE PECAN TREES

You can save years in results by planting the large Bearing Pecan trees which we offer from our Orchard selections. These trees are nice Specimens growing in our fields, which have been bearing already and by pruning back the tops in transplanting with proper care can be bought back into bearing within the second year.

In this group of trees we offer the same Standard varieties as offered in small Nursery size trees, but these large trees we should move B&B (Balled and Burlapped) to cause as little disturbance to the roots as possible. These nice large trees are nice for Shade trees, as well as for the pecans to be harvested from them.

PRICES FOR B&B SPECIMEN BEARING SIZE PECAN TREES:

Class	Caliper	Price Each
B&B	4 in.	\$42.00
B&B	5 in.	60.00
B&B	6 in.	75.00
B&B	7 in.	98.00

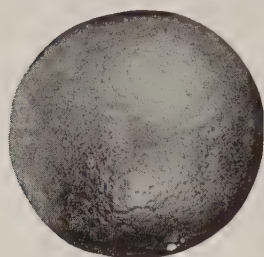

LARGE PECAN TREES HANDLED B&B

The large bearing size Pecan trees which we have growing in our Nursery are well spaced and nicely shaped Trees. By transplanting them B&B, with little disturbance to the root system, we find that the bearing-size trees transplant with good results, and the second year after planting they begin to bear again. This saves a long wait for Pecans over waiting for the small trees to come into bearing.

CITRUS FRUIT TREES

Everyone in the coastal section of Louisiana and Texas should plant some of the many kinds of Citrus Fruits. Satsuma Oranges, Round Oranges, Grape Fruit, Lemons, and Kumquats are all highly desirable, very delicious fruits, command high prices on the market, and can be grown with all ease in the back yard.

La. Sweet Orange

SATSUMA ORANGE

(Improved) *Citrus oonshiu*

This "Kid Glove" type is the early market Orange for the Coast Section. Hardest Orange known. Begins bearing the second year. Fruit is medium size, flattened, deep orange color, fine grained, juicy, sweet and delicious. Seedless and thornless.

Class	Caliper	xxx
B&B	1/2 inch	\$ 5.90
B&B	5/8 inch	7.50
B&B	3/4 inch	10.70
B&B	1 inch	14.80
B&B	1 1/4 inch	19.00

Low Branched Satsuma Orange Tree

To Protect Citrus

WE ADVISE BANKING

We advocate the use of low branched Citrus trees, which are better able to withstand cold than those trained up on one slender stem, and in addition we have found that banking dirt in a mound high up around the tree 18 to 20 inches will protect the body of the tree from freezing, and at the worst, when such precaution is taken, only the smaller branches can be lost, and the next crop materially reduced.

For all the black, waxy and stiff clay or shallow sandy lands in Texas and Louisiana, Oranges, etc. should be budded on Citrus Trifoliata root. For delta land, along the lower Mississippi and Rio Grande Rivers and deep sandy soil, oranges should be budded on native Florida Sour Orange Root.

Citrus Trees should be low branched and dirt banked among limbs during winter months. Our low branched Trees are sold according to caliper, measured just below the branches, not by height or age. All Citrus budded on Citrus Trifoliata Root Stock.

Low Branched Trees

Satsuma Orange Tree low branched, budded on Citrus Trifoliata understock, are most desirable for Home and Orchard Plantings. They are quite ornamental as well as fruitful, and easier to keep pruned and sprayed when low spreading.

KUMQUAT

The Kumquat Tree is very hardy, a good grower, and bears fruit on its new growth. The first season it is planted out, or should it freeze back to the banking, it will bear the first year a heavy crop, and thus never lose a crop.

KUMQUAT, MEIWA

Fortunella japonica

Bright green foliage. Fruit large nearly round; deep yellow. Sweet and delicious. Profic bearer.

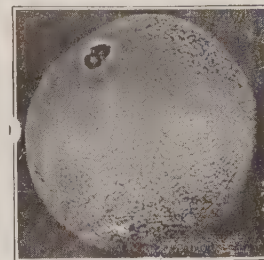

Class	Caliper	xxx
B&B	1/2 inch	\$ 5.90
B&B	5/8 inch	7.50
B&B	3/4 inch	10.70
B&B	1 inch	14.80
B&B	1 1/4 inch	19.00

LEMON

MYER'S *C. limonia myers*

The Myers Lemon is as hardy on the Coast as the Grapefruit and Round Oranges. This is a new variety introduced by the U. S. Government. Better than ordinary commercial varieties.

Class	Caliper	xxx
B&B	1/2 in.	\$ 2.90
B&B	3/4 in.	4.00
B&B	1 in.	5.80
B&B	1 1/4 in.	7.90
B&B	1 1/2 in.	10.30
B&B	2 in.	15.00
B&B	2 1/2 in.	20.00

Navel Orange.

ROUND ORANGES

In addition to the Satsuma Oranges which are most prolific in the Gulf Coast Region, we offer Bearing Size low branched Round Oranges which thrive exceedingly well and bear heavy in this area also. We list below the three best varieties for this area, which include the Louisiana Sweet, Lue Gim Gong, and Valencia Oranges. These ripen late and give fresh fruit over a longer period of time.

LOUISIANA SWEET

Citrus species

Thin-skinned, juicy, sweet and delicious fruit of medium size. Especially good for the Coastal Region of Texas and Louisiana.

LUE GIM GONG

Citrus species

A new late Orange. Trees are thrifty growers. Fruit is large. Skin smooth; flesh deep orange, very juicy. Flavor is rich and sweet. Seedless or very nearly so.

VALENCIA

Citrus species

Best late California Orange. Called "Sun kist". A late and prolific orange of exceptionally good quality. Fruit large size, oval or rounded in shape; juicy and tender, good flavor.

B&B	4 in.	Bearing	Size	...	42.00

WE GIVE THE EARTH -- B & B

Digging a B&B Tree.

No Roots Exposed to the Air.

The Dirt Can't Break Away From the Roots.

A FEATURE ABOUT GRIFFING'S B&B NURSERY STOCK YOU MUST NOT OVERLOOK

Our GREAT SUCCESS in transplanting Trees and Shrubs safely at all Seasons may be largely ATTRIBUTED to our Wonderful Balling Soil. There is no OTHER JUST LIKE IT. We have the soil that is "just right" for Balling and Burlapping. The Ball is CUT out in one solid piece, often compared TO SLICING A "piece of cheese." Note the solidity of the Ball in the illustration.

CAUTION

Never lift Trees and shrubs by the Top. Lift the Ball Itself by grasping it with both hands around the ball, or Larger Balls by making a Sling of Burlap, so as not to loosen Roots in the Ball.

NB MEANS NOT BALLED

Or that the Trees or Shrubs SO LISTED are dug from the Nursery WITHOUT HAVING THE DIRT ABOUT THE ROOTS. When Trees or Shrubs are dug in this manner, they are puddled in THICK MUD; than mulched IN SHINGELTOW or SAWDUST, and tightly wrapped with paper and BURLAP to retain the moisture WHEN SHIPPED or delivered.

BEAUMONT BALLING SOIL

It is commonly known as "BEAUMONT LOAM," peculiar only to this IMMEDIATE SECTION. It is RICH AND BLACK, and when taken up in the form of a ball, IT WILL NOT crack or CRUMBLE, and does not DISSOLVE WHEN SET IN WATER for several days.

WIRING B&B TREES FOR SAFE HANDLING

For safety in handling large Specimens of Live Oaks, Camellias, Azaleas, Magnolias, etc., which require a sizeable ball of earth for transplanting, we recommend the wiring of the Balls after they are dug B&B, as a precaution in transplanting them. We offer this service at a nominal cost above the price of the B&B Trees, to those Customers who desire it.

LARGE TREES NEED PROPER HANDLING

In handling large Evergreen Specimens, where they require and should have a large size Ball (B&B), averaging 24 inches width, or 18 inches deep we recommend wrapping the balls with Hog Wire, twisting it tightly around the Balls, after the Ball is properly burlapped. By doing this, they can be shipped and planted with perfect safety, as there would be no chance of the burlap loosening, or the Ball cracking in being shipped or handled.

Notice Hog Wire Fence Around Ball. Safe For Lifting With Chains and Power Winch.

Trees Dug with large size Balls from Griffing's heavy soil are uniform and solid, containing the root system of the Trees. After the Burlap is fastened on securely, Hog wire fence is used to wrap around the ball to make it more secure for handling. Chains are thrown around the Ball to lift it out of the hole, and onto Trucks or cars for delivery.

PRICE FOR WIRING B&B TREES & SHRUBS

We have not included price of Wiring in listed prices of Specimens, but have left it optional with the customers if they want their trees wired, after they are dug and burlapped. Prices for the wiring of Balls, according to size ranges as follows:

Balls 24 inches in diameter	\$2.00 each
Balls 30 inches in diameter	2.50 each
Balls 36 inches in diameter	3.00 each
Balls 40 inches in diameter	4.00 each
Balls 48 inches in diameter	5.00 each
Balls 54 inches in diameter	6.00 each
Balls 60 inches in diameter	7.00 each

Balls larger in size than these will be priced according to the size of the Ball, quantity, etc., required!

This also saves crating the Trees and Shrubs for shipment, and if planted locally, they can be loaded and unloaded and transplanted with more safety. It also saves the expense of bracing the Trees, and should they blow over where the trees are wired, they can be straightened up, even though planted a year or more, with perfect safety that the soil will not break loose from the roots.

MAGNOLIAS AND LIVE OAKS READY TO LOAD

A group of Specimen Live Oak Trees and Magnolias dug B&B, and balls wired properly for loading into Railroad cars for shipment. Trees prepared like this handle easily and without injury and live and grow when they are planted.

CULTURAL SUGGESTIONS FOR GARDENING

Griffing's best methods for Planting and Care of Trees and Shrubbery for best results, after years of experience in replanting of all size and classes of plant materials. These suggestions are given in an effort to help our Customers have the best success in planting out the materials we supply them—as Satisfied Customers bring return business back to you.

PROPER CARE OF B&B TREES AND SHRUBS

When Customers receive shipments of Griffing's B&B Trees and Shrubbery, the best method for care of this material until it is replanted is to keep it well watered. To do this, we recommend that the balls be set in water in the shade and allowed to soak up thoroughly. The soil does not melt down when wet, as it is heavy. Keep well watered in this manner until it is replanted in the ground.

PLANTING B&B TREES & SHRUBS

Griffing's Trees and Shrubs require a somewhat different method of planting if they give the satisfying results after they are in the ground. If these few precautions are followed, you'll have the same success in plantings as we do, with 100% Results!

In planting in the Gulf Coast Area, dig the hole only as deep as the ball itself. Set the ball in the hole on level hard bottom, leave the burlap (and wire) on the balls, and after they are fully soaked, set the tree in the hole upright and turned for the best effects, in the locations used.

Next, spade in the sides of the hole around the plant out to a distance of three or four feet, letting the soil spaded fall into the hole around the tree. Spade up and pulverize this soil to a depth of 12 inches or more, pressing the dirt next to the ball. You will have enough soil to cover the top of the ball and the hole in which it is planted.

FINISHING OFF THE PLANTING JOB

Your Tree is just partly planted at this point. Use the soil thrown out of the hole, to make a ridge or basin rim 6 to 8 inches high around the outer edge of the spaded area, which will hold plenty of water afterwards.

Water the Tree before you finish—Push the hose down beside the ball and let it run until the basin is filled. This will fill in all the air spaces and settle the soil firmly.

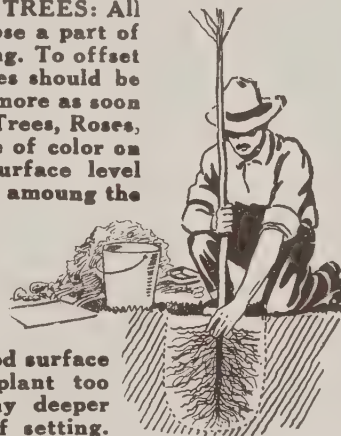

MULCH AROUND THE NEWLY PLANTED TREES

After the water has soaked away once or twice and soil is replaced to a smooth level, mulch the top surface of the tree with a bushel of stable manure and settle in place with more water.

KEEP BASIN & MULCH AROUND TREES

Newly planted trees need water and fertilizer, and cultivation, so keep this basin around your trees for a year or more to facilitate cultivation, and watering. Do not let the trees become dry—water thoroughly when you water but not more often than twice weekly. Do not allow lawn grasses to cover the planting space of newly planted trees.

HOW TO PLANT N-B TREES: All NB (Bare Root) Trees lose a part of their roots in transplanting. To offset the root loss, the branches should be pruned back half way or more as soon as planted. To plant NB Trees, Roses, etc. you will see a change of color on the trunks where the surface level should be. Fill in fine soil among the roots, placing the roots carefully in the position they should grow. Follow the same instructions as for Planting B&B Trees.

DRAINAGE: Have good surface drainage, and do not plant too deep. Don't dig hole any deeper than the ball because of setting.

FERTILIZING: Do NOT use any fertilizer in the hole when planting unless it is a small amount of bone meal for each plant. In most soils, renewed strength in the way of dairy manure for plant food should be applied at least once a year, usually during the winter. The application of well-rotted and pulverized dairy manure will make the beds more pliable and allow for cultivation of same more rapid and readily after much rainfall. Commercial fertilizers are satisfactory to use in small quantities during the growing season.

CULTIVATION: All types of Planting Materials require systematic cultivation. After Shrubs have been planted and the beds are put in good condition by working and fertilizing, we recommend that the surface of the beds be stirred to a depth of two or three inches and maintain a mulch. A pronged fork is one of the best Garden tools to use in breaking the crust which will form on the beds after each application of water or rain.

HOW TO WATER TREES AND SHRUBS: To water newly planted Trees and Shrubs, push the end of the hose down beside the ball and let water run until the basin is full. This will fill all air spaces. Repeat every week if needed to keep soil moistened. Mulch with rough straw or lawn clippings mixed with stable manure.

PRUNING AND CARE OF SHRUBS

PRUNING: Most Evergreens, including Broadleaf and Coniferous types, as well as Fruit Trees and some Flowering Shrubs should be pruned during the dormant period. If you wish to retain the natural appearance of Shrubs, so they will not out-grow their positions, they should be re-shaped by cutting off the long "shoots" inside the natural edge of the specimen, and not cut uniform to make formal plants of them. Some Flowering Shrubs, which bloom only early in the spring should be pruned after the blooming period to have blooms the following spring, as these types produce their blooms on the past season's growth.

SPRAYING: Certain Plant Materials require spraying for the most prevalent types of insect and fungus.

The most common enemies of the Coniferous Evergreens are Blight, Bag worms, and Red Spider.

For all CHEWING OR FOLIAGE eating insects, a stomach poison must be applied to the foliage. Use ARSENATE OF LEAD.

For such insects as Red Spider, or any of the similar ones which draw the sap from the foliage SULPHUR should be applied.

For PLANT LICE AND APHIDS, nicotine sulphate should be applied.

For MILDEW OR FUNGUS DISEASE, such as Black-spot, leaf blights, etc., use Bordeaux Mixture.

For SCALE INSECTS and WHITE FLY, spray with lime sulphur if trees are dormant. For Summer spray or for Evergreens, use an oil EMULSION.

SERVICES OF PLANTING, FERTILIZING AND SPRAYING

While we make no speciality of Service Work in Gardening, we do like to see our customers get results in the Trees and Shrubs which we sell to them, and always take time and effort to instruct the purchaser on the right manner of planting and how to take care of their trees for best results.

LOCAL PLANTING SERVICES CAN BE ARRANGED

On complete Landscape jobs, where a full Crew of Workmen can be used on the job, we arrange to Supervise and plant the materials in place according to the Landscape Plans which we prepare for our customers; or follow the plans which have been furnished by the Landscape Architect in charge of the work. The charge for this Planting Service is based on the individual job, and its location, but we do average the charge on a minimum basis to cover the cost of supervision and labor involved.

For the benefit of our customers who do their own planting locally, and too far away for us to service, we urge that you read carefully the Planting Instructions offered elsewhere in this Catalog. Our B&B Trees and Shrubbery are easy to plant, and will live and grow provided you plant them right, and water and cultivate fully after planting is done.

FERTILIZING TREES & SHRUBS WHEN PLANTED

Ornamental Trees and Shrubbery should have a nominal amount of Bone-Meal Fertilizer applied at the time of planting, and we recommend that you use this for results. If unable to obtain from your local Fertilizer Dealer, let us know your requirements and it can no doubt be furnished at the time your order is made up.

Other applications of Chemical fertilizers should be applied to special items in some areas where the soil conditions require it. Particularly

should Camellias, Azaleas, Gardenias, Roses, and a few other items receive special treatment. Granulated Iron Sulphate, and Peat Moss are available in limited quantities, and will be priced upon request.

SLAXIDE SPRAY (Oil Emulsion) FOR WHITE FLY

We recommend for best results in the control and eradication of White Fly which attacks Privet (Common hedge), Citrus fruit trees, and Gardenias, that the Oil Emulsion Spray material (SLAXIDE) be used. You may be able to secure this from your local SeedHouse, but if not let us know and we will be glad to fill your requirements.

STANDARD GUARANTEE ON B&B TREES AND SHRUBBERY

We follow the National Landscape Nurserymen's Assn. in giving the same Guarantee on the life of Trees and Shrubbery we sell as follows:

"Provided account is paid in accordance with terms of sale, and plants have received reasonable care, and have not been maliciously destroyed, we will replace at one-half original cost, all woody plants furnished and planted by us, which fail to survive one growing Season."

The above does not cover plants purchased on the Nursery grounds and not planted by us.

IRRIGATION

This is one of the facilities WE APPRECIATE MOST in the production of quality Nursery Stock. Fresh Neches River WATER can be applied thru FLOOD IRRIGATION anytime OF THE YEAR. In this way the plants never suffer OF GROWTH, instead a compact ROOT GROWTH is developed. No roots have TO SEEK moisture for a LONG DISTANCE. The illustration shows the VALUE OF THIS in digging B&B Plants for transplanting and saving of ROOT SYSTEM.

PLANTS GROWN ON IRRIGATED LAND LOSE 5% OF ROOTS

PLANTS GROWN ON NON-IRRIGATED LAND LOSE 40% OF ROOTS

HOW WE BALL

We do not SPADE THE BALLS OUT and tie burlap around the LO-OSENEED SOIL, nor do we DRIVE a CYLINDER around to cut roots TOO SHORT, but the SOIL IS SOLID, never cracked and SIZE OF BALL to conform to the ROOT SYSTEM.

WHAT IS B&B

Moving a Tree with THE ROOTS in the DIRT in WHICH IT GREW. The Griffing method of B&B has upset all traditional customs about TIME OF PLANTING, size that CAN BE PLANTED, and has eliminated years from planting TIME to the day when the effect is really visible.

ADVANTAGES OF B&B

When Trees and Shrubs are TRANSPLANTED B&B they grow; they REQUIRE LESS maintenance; they do not require SEVERE PRUNING TO MAR THEIR Appearance; they are EASIER to PLANT, and a year or more IS GAINED in the GROWTH of a B&B Tree over one PLANTED NB.

Plants like people are individuals, and all ROOT SYSTEMS are not alike; therefore, balling cannot BE MECHANICALLY done for the sake of LOOKS and the best results secured. Our men preserve the ROOT SYSTEMS of the Plants FOR SAFE transplanting.

Oleander Flowers, White and Pink.
Other colors offered also for Southern Plantings

Stuart Pecan (Old Reliable)

Myer's Lemon (Citrus Limona)

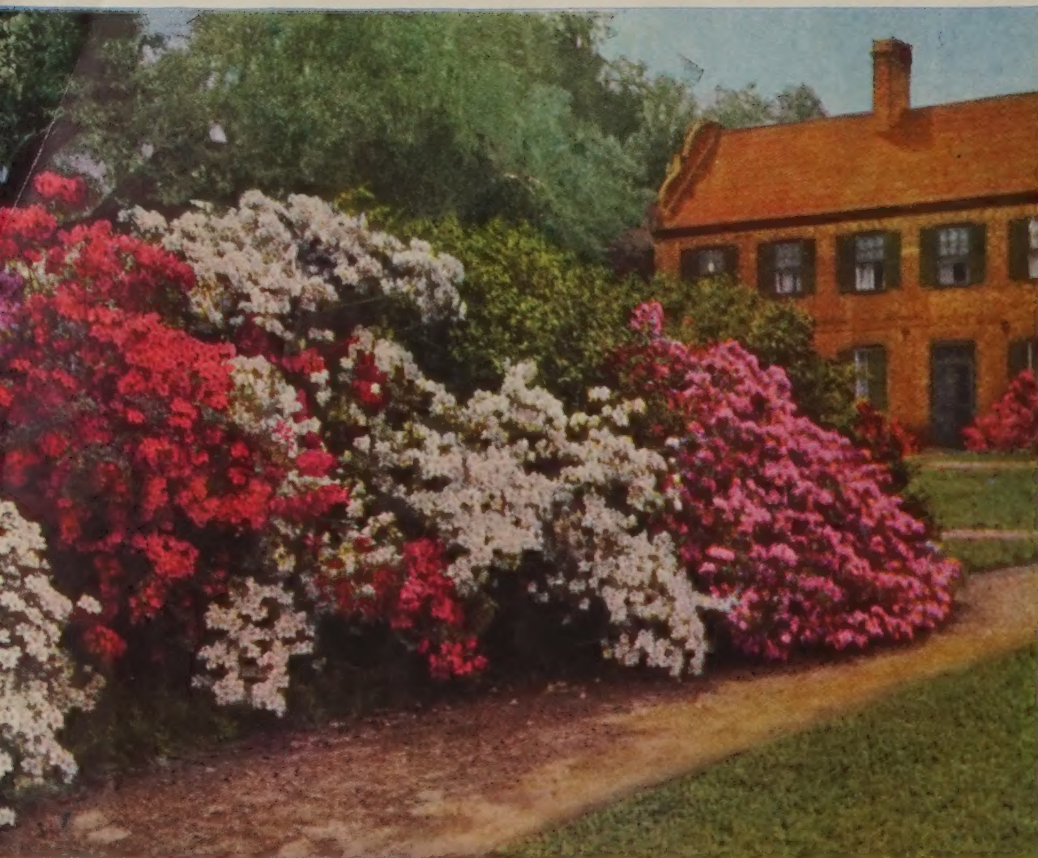

Griffing's

NEW FIRETHORN

Since the new "WILMA FIRETHORN" was offered for general planting, it has been difficult to supply the demand. With its luxuriant growth and very large deep rich red berries, it is the most outstanding of all Firethorns. Beautifully colored red berries in the Fall and Winter, and white showy flowers in the Spring makes this selection desirable for general Landscape plantings.

Celestial Figs (Little Blue Sugar Fig) are fruitful and ornamental for Home Plantings.

Massive effects in borders in the landscape are obtained where large size Indica Azaleas are used. They create outstanding beauty wherever found.

Successful Azalea Plantings

Everyone can be successful in planting Azaleas provided they will use our field-grown, hardy type of INDICA AZALEAS, which are grown in the open fields under all weather conditions, and when dug properly, Balled & Burlapped, (B&B) have a root system that will give satisfying results.

President Clay Azalea (*Azalea indica*)

Flowering Quince (*Cydonia japonica*)
